LETTER OF TRANSMITTAL.

DEPARTMENT OF COMMERCE,
BUREAU OF THE CENSUS,
Washington, D. C., March 15, 1915.

SIR:

I have the honor to transmit herewith Volume II of the report on Wealth, Debt, and Taxation for the fiscal year 1913.

This volume completes the report on the decennial investigation of this subject. It contains Parts VI, VII, and VIII of the report, the data of which have already been published in three bulletins entitled, respectively, "National and state revenues and expenditures: 1913 and 1903; and public properties of states: 1913," "County revenues, expenditures, and public properties: 1913," and "Municipal revenues, expenditures, and public properties: 1913."

This report was prepared under the supervision of Starke M. Grogan, chief statistician in charge of Wealth, Debt, and Taxation; John Lee Coulter, expert special agent in an advisory capacity; and Arthur J. Hirsch, chief of division.

Respectfully,

Director of the Census.

To Hon. WILLIAM C. REDFIELD,
Secretary of Commerce.

WEALTH, DEBT, AND TAXATION
1913

VOLUME II

WEALTH, DEBT, AND TAXATION.

INTRODUCTION.

Scope of volume.—Volume II contains the statistics of receipts and payments of the National Government, the 48 state governments, the counties, and the incorporated places for the year 1913. Part VI presents the receipts and payments of the national and state governments; Part VII, those of counties; and Part VIII, those of incorporated places having a population of 2,500 and over.

Each part carries its own text discussion and definition of terms ruling in its compilation. This results in the repetition of definitions of terms under the heading "Accounting terminology." This repetition is allowed so that reprints of complete parts may be most conveniently made.

The data presented for incorporated places include the transactions for school and other independent districts when they are practically coextensive with the incorporated places, while the transactions for the National Government, the states, and counties are exclusive of all independent divisions. Certain civil divisions, such as townships, road, drainage, irrigation, and levee districts, etc., and school districts in incorporated places of less than 2,500 inhabitants are not reported.

Summary of all receipts and payments.—Table I, which follows, presents for the four classes of civil divisions and for the aggregate of all classes a summary of receipts classified as revenue and nonrevenue and of payments classified as governmental cost and nongovernmental cost, together with the cash balances at the beginning and close of the year. As revenue receipts are summarized all amounts that are recorded in the books of the several divisions as having been received on revenue account other than receipts in error and accrued interest received on the original issue of debt obligations. As nonrevenue receipts are summarized all receipts other than revenue. As governmental cost payments are summarized all amounts recorded in the books of the several divisions as having been paid on account of expenses, interest, and outlays, other than payments in error, payments of accrued interest on investments purchased, and payments for outlays balanced by amounts credited in outlay accounts. As nongovernmental cost payments are summarized all payments other than governmental cost payments. The receipts and payments here summarized are shown in detail in Tables II and IV, which follow, and in still greater detail in the tables of Parts VI, VII, and VIII.

TABLE I.—SUMMARY OF RECEIPTS, PAYMENTS, AND CASH BALANCES OF THE NATIONAL GOVERNMENT, STATES, COUNTIES, AND INCORPORATED PLACES HAVING A POPULATION OF 2,500 AND OVER: 1913.

SUBJECT.	Aggregate.	National Government.	States.	Counties.	Incorporated places.
Aggregate of receipts and cash balances	$8,070,944,432	$3,891,501,454	$643,823,550	$1,067,619,247	$2,468,000,181
Cash balances at beginning of year	2,459,571,034	1,841,687,848	117,176,715	171,950,795	328,755,676
Revenue receipts	2,799,422,402	953,596,637	367,585,331	370,043,046	1,108,197,388
Nonrevenue receipts	2,811,950,996	1,096,216,969	159,061,504	525,625,406	1,031,047,117
Aggregate of payments and cash balances	8,070,944,432	3,891,501,454	643,823,550	1,067,619,247	2,468,000,181
Cash balances at close of year	2,544,383,059	[1] 1,893,628,805	136,975,610	185,214,074	328,564,570
Governmental cost payments	2,966,970,493	952,600,857	382,551,199	385,181,760	1,246,636,677
Nongovernmental cost payments	2,559,590,880	1,045,271,792	124,296,741	497,223,413	892,798,934

[1] Includes $4,510,651 excess of postal receipts.

Summary of revenue receipts and governmental cost payments.—Table II, which follows, presents a summary, by class of civil division, of revenue receipts and governmental cost payments, total and per capita. The summary is based upon a classification of revenue receipts, by source of receipt, and of governmental cost payments, by object of payment. The tables upon which this summary is based and the definitions of the several classes of receipts and payments may be found in Parts VI, VII, and VIII.

TABLE II.—REVENUE RECEIPTS AND GOVERNMENTAL COST PAYMENTS OF THE NATIONAL GOVERNMENT, STATES, COUNTIES, AND INCORPORATED PLACES HAVING A POPULATION OF 2,500 AND OVER: 1913.

[1] Includes population of Kansas, enumerated as of Mar. 1, 1913, by state census.
[2] Excludes population of independent cities, counties under municipal government, St. Johns County, Fla., and the state of Rhode Island.
[3] For places of less than 8,000 inhabitants, enumerated as of Apr. 15, 1910.
[4] Includes $313,616, receipts from the income tax.
[5] Less than one-half of 1 cent.

Per cent distribution, by principal classes, of revenue receipts and governmental cost payments of all civil divisions.—Table III below presents, by class of civil divisions, the per cent which the receipts from the principal classes of revenues constitute of such total revenue and the per cent which the payments for each of the principal classes of governmental cost payments constitute of the total of such payments. The percentages here shown are based upon the tables of receipts and payments of Parts VI, VII, and VIII.

TABLE III.—PER CENT DISTRIBUTION, BY PRINCIPAL CLASSES, OF REVENUE RECEIPTS AND GOVERNMENTAL COST PAYMENTS: 1913.

CLASSES OF REVENUE RECEIPTS AND GOVERNMENTAL COST PAYMENTS.	All civil divisions.	National Government.	States.	Counties.	Incorporated places.
Revenue receipts:					
Property taxes	52.9	32.9	56.4	76.4	61.1
Poll taxes	0.6	0.5	0.8	1.6	0.3
Business and nonbusiness license taxes	18.4	36.0	24.5	2.7	6.5
Special assessments and charges for outlays	4.0	.....	1.8	2.5	8.8
Fines, forfeits, and escheats	0.5	0.3	0.4	1.0	0.6
Highway privileges, interest, and rents	2.7	([1])	5.8	1.5	4.4
Subventions, grants, donations, gifts, and pension assessments	3.0	.....	1.0	6.5	5.1
Earnings of general departments	3.8	1.9	8.9	7.7	2.3
Earnings of public service enterprises	14.1	28.4	0.5	0.1	10.8
Governmental cost payments:					
Expenses of general departments	62.7	62.9	82.7	72.1	53.5
Expenses of public service enterprises	11.2	27.7	0.9	([1])	5.1
Interest	6.4	2.6	3.7	4.5	10.6
Outlays	19.7	6.8	12.7	23.3	30.8

[1] Less than one-twentieth of 1 per cent.

Per cent relation of revenue receipts and governmental cost payments of all civil divisions.—Basing the computations upon the figures of Table II, it is found that of the revenues of the National Government, 93.1 per cent was required for meeting expenses and interest; of the state governments, 90.9 per cent; of the counties, 79.8 per cent; and of the incorporated places, 77.9 per cent. After expenses and interest were paid there remained, available for outlays and other purposes, 6.9 per cent of the revenues of the National Government; 9.1 per cent of those of states; 20.2 per cent of those of counties; and 22.1 per cent of those of incorporated places.

Summary of nonrevenue receipts and nongovernmental cost payments.—Table IV, which follows, presents a summary of the nonrevenue receipts and nongovernmental cost payments of the several classes of civil divisions. Of the five classes of nonrevenue receipts those from the issue of debt obligations constitute the largest per cent of the total of such receipts for every class of civil division except counties. In counties the receipts in trust and agency transactions were the most important class of nonrevenue receipts. Likewise, the greater portion of the total of nongovernmental cost payments, except for counties, is represented by the payments for redemption of debt obligations; and for counties, by payments in trust and agency transactions. The receipts and payments in counterbalancing transactions for states do not

balance because of the fact that the payments for outlays during the year in one state, Tennessee, were not equal to the amount offsetting outlays credited to the account of outlays during the year. General transfer receipts, comprising transfers between departments independently administered, amounted to $169,942,203, while general transfer payments amounted to $159,381,870, the difference being due to difference in the fiscal years of departments and funds belonging to the same civil division.

The amounts received from sales and paid for the purchase of investments and supplies show that during the year 1913 the civil divisions of the United States increased their assets in the form of investments and supplies to the amount of $71,698,801; the National Government decreased its assets of this class $3,558,788; the 48 state governments, the counties, and the incorporated places increased theirs to the amount of $10,076,958, $1,723,447, and $63,457,184, respectively.

TABLE IV.—NONREVENUE RECEIPTS AND NONGOVERNMENTAL COST PAYMENTS OF THE NATIONAL GOVERNMENT, STATES, COUNTIES, AND INCORPORATED PLACES HAVING A POPULATION OF 2,500 AND OVER: 1913.

SUBJECT.	Aggregate.	National Government.	States.	Counties.	Incorporated places.
Nonrevenue receipts	$2,811,950,996	$1,096,216,969	$159,061,504	$525,625,406	$1,031,047,117
From sales of investments and supplies	115,137,755	3,558,788	27,648,759	3,383,364	80,546,844
From issue of debt obligations	1,955,742,979	1,059,082,850	77,906,436	86,051,348	732,702,345
From trust and agency transactions	549,298,690	20,145,349	28,519,067	425,331,927	75,302,347
From counterbalancing transactions	27,829,369	13,429,982	1,441,082	3,136,937	9,821,368
From general transfers	163,942,203	.....	23,546,160	7,721,830	132,674,213
Nongovernmental cost payments	2,559,590,880	1,045,271,792	124,296,741	497,223,413	892,798,934
For purchase of investments and supplies	186,836,556	.....	37,725,717	5,106,811	144,004,028
For redemption of debt obligations	1,643,519,003	1,011,251,811	36,495,682	58,965,207	536,806,303
In trust and agency transactions	542,042,937	20,589,999	25,106,555	422,226,435	74,119,948
In counterbalancing transactions	27,810,514	13,429,982	1,422,227	3,136,937	9,821,368
By general transfers	159,381,870	.....	23,546,560	7,788,023	128,047,287

Aggregate value of public properties and assets of funds other than sinking funds.—Table V, which follows, presents, by geographic divisions and states, the value of the properties belonging to states, counties, and municipalities and the assets of their investment and public trust funds at the close of the fiscal year 1913. The table shows separately the values of properties of public service enterprises. The assets of sinking funds, which are omitted from this table, may be found in the tables of Parts II and III in Volume I.

TABLE V.—VALUE AT CLOSE OF FISCAL YEAR OF PROPERTIES AND ASSETS OF FUNDS, OTHER THAN SINKING FUND ASSETS, OF STATES, COUNTIES, AND MUNICIPALITIES: 1913.

GEOGRAPHIC DIVISION AND STATE.	Total.	VALUATION OF LAND, BUILDINGS, AND EQUIPMENT OF GENERAL DEPARTMENTS, AND ASSETS OF INVESTMENT AND PUBLIC TRUST FUNDS.				VALUATION OF LAND, BUILDINGS, AND EQUIPMENT OF PUBLIC SERVICE ENTERPRISES.

PART VI

NATIONAL AND STATE REVENUES AND EXPENDITURES: 1913 AND 1903; AND PUBLIC PROPERTIES OF STATES: 1913

PART VI.

NATIONAL AND STATE REVENUES AND EXPENDITURES: 1913 AND 1903; AND PUBLIC PROPERTIES OF STATES: 1913.

INTRODUCTION.

Scope of Part VI.—Part VI of this report presents for the National Government and the 48 states comparative statistics of their revenues and expenditures, total and per capita, for the fiscal years 1913 and 1903, which closed June 30 of those years, or the last fiscal period which closed prior thereto, and the value of the public properties of the states at the close of the fiscal year 1913. The data for 1903 are taken from the decennial report on Wealth, Debt, and Taxation for that year.

ACCOUNTING TERMINOLOGY.

The necessity for a definite basis of classification.—Census statistics are by the requirements of law based upon official records. These records, as far as they are exhibits of financial transactions, are, in the majority of cases, the records of receipts and payments and do not show the actual revenues or the costs of government for the fiscal period. Under such circumstances the only statistics of financial transactions that are practicable are classified exhibits of receipts and payments. In the absence of uniformity in the use of financial terms in the reports of accounting officers, the Bureau of the Census has formulated a definite and standard use of terms. The present significance of these terms, which has grown out of the early and tentative meaning assigned them, is based upon the usage of the best writers on commercial accounting, modified to meet the special requirements of governmental accounts.

As an aid to the intelligent use of the data contained in Part VI, there are herewith given brief definitions of certain terms as employed by the Bureau of the Census.

Primary classification of receipts.—In these statistics the receipts recorded in local accounts and reports are arranged in two primary classes, called revenue receipts and nonrevenue receipts.

Revenue receipts.—The term "revenue receipts" is here applied to the moneys and other wealth, received by governmental units for governmental purposes, which increase their aggregate assets without increasing their debt liabilities. In Part VI there have been tabulated as revenue receipts all amounts recorded in local revenue accounts, less amounts which have been returned or are to be returned by reason of error or otherwise. The most important of the national and state revenues are specifically mentioned and described in the paragraphs which follow.

Taxes.—Taxes are enforced proportional contributions of wealth levied and collected in the general interest of a community, from individuals and corporations, by virtue of the sovereignty of the Nation or state, for the support of governments and for the defrayal of all expenses growing out of the public needs, which are levied without reference to the special benefits which the contributors may severally derive from the public purposes for which the taxes are required.

General property taxes.—A general property tax is a tax levied at the same rate upon the greater portion of the property within the territory subject to the taxing power. A similar tax levied upon a specified class of property within that territory is called a *special levy of the general property tax;* and if levied upon a specified portion of that territory, it is called a *local levy of the general property tax.* A general or a special levy which is applicable for a specified purpose is further designated as a *specific levy of the general property tax.*

Special property taxes.—"Special property taxes" is the designation here applied to those direct taxes levied upon property which are assessed, levied, and collected by methods not generally applied in the case of real property. As such taxes the Bureau of the Census

includes all taxes upon the property of corporations levied upon the basis of the amount of corporate stock, corporate indebtedness, or of both corporate stock and indebtedness, or by any method other than upon the basis of the valuation of all property of the corporation; taxes upon savings banks and kindred corporations, which are levied in proportion to deposits or in proportion to a certain specified portion of deposits, as their excess above the value of specified investments; and taxes upon life insurance corporations assessed upon the basis of the valuations of their policies. Special property taxes also include all taxes levied upon mortgages at the time of their execution or entry of public record, and taxes on investments, choses in action, bonds and notes for specified periods of time, and all specific taxes upon property, taxes upon horses, mules, and other animals in specified amount per head, taxes upon grain in specified amount per bushel, or taxes upon ships in specified amount per ton of capacity.

Poll and occupation taxes.—As poll and occupation taxes, the Bureau of the Census includes all exactions by the government from private individuals which are levied without regard to the property or income of the taxpayer. These taxes comprise (1) all so-called poll or capitation taxes, whether levied in special amounts upon all males of specified ages or levied as *quasi* property taxes based upon an arbitrary valuation of polls; (2) all so-called poll taxes graded in amounts according to occupations; and (3) all exactions of personal service, as work upon the highways or elsewhere, whether classed in local statutes as taxes or otherwise. Poll or personal taxes graded according to occupation may, with propriety, be called occupation poll taxes. These are to be distinguished from business taxes, since they are primarily levied upon persons and not upon the business or business activity by which the taxpayer secures an income.

Special assessments.—Special assessments are proportional contributions of wealth levied against land and collected from its owners and occupants to defray the costs of specified public improvements made, or of specified public services undertaken, in the interest of the general public. Special assessments, like taxes, are levied and collected under the sovereign powers of the state.

Business and income taxes.—These are taxes collected from persons, natural or corporate, by reason of their business or income, where such collection is not associated with the granting of a license or permit to carry on a particular business. Business taxes as here defined may be levied with or without reference to benefits conferred upon or enjoyed by the taxpayer. As such taxes the Bureau of the Census includes all taxes levied upon railroad, insurance, and express companies, and all other corporations or individuals in proportion to their gross receipts.

Business license taxes.—Business license taxes are taxes exacted in connection with the issue of a written instrument, called a license or permit, which authorizes the licensee to engage in some specified business or business activity. In Part VI business license taxes are tabulated as "Liquor licenses and other imposts" and "Other business licenses."

Nonbusiness license taxes.—Nonbusiness license taxes are taxes other than upon business that are exacted primarily for purposes of regulation, and are collected in connection with the issue of so-called licenses or permits, and are always levied with reference to measurable or assumed measurable benefits conferred upon or enjoyed by the taxpayers. The receipts from these taxes include license taxes paid by persons granted (1) dog licenses, (2) general licenses, and (3) permits.

In the first class, or that of *license taxes on dogs*, are included all taxes which are collected from the owners of dogs in connection with the issue of licenses or permits to keep such animals for a specified period of time, generally a year.

In the second class, or that of *general license taxes*, are included all nonbusiness license taxes that are collected in connection with the issuance of licenses or permits other than for keeping dogs, which are granted for a specified period of time, as a year, month, or day. Among taxes of this kind are those collected for vehicles, as automobiles, bicycles, etc., irrespective of whether these vehicles are kept for business or pleasure.

In the third class, or that of *permit taxes*, are included all nonbusiness taxes that are collected in connection with the granting of so-called licenses or permits which authorize specified acts or transactions, as marriage licenses or permits, and departmental permits.

Fines, forfeits, and escheats.—The terms, fines, forfeits, and escheats are here defined as follows: Fines are amounts of wealth exacted from individuals, firms, and corporations under the sovereign power of inflicting punishment for violation of law; forfeits are amounts accruing to governments in accordance with the terms of contracts as penalties for nonobservance of such contracts; and escheats are amounts of money received from the disposal of properties the owners of which can not be ascertained or located.

Highway privileges.—These receipts are amounts of money received by states and other civil divisions as compensation for special privileges in, upon, under, or over the public highways granted to particular individuals and corporations beyond the privileges of other individuals and corporations. Such receipts, however, are not found among the revenues of the nation nor among those of the states for the years reported.

Interest and rents.—Interest receipts represent all interest received by the general treasury and by the separate funds except (1) receipts of interest on taxes and special assessments, which are included with the

receipts from original levies reported under those titles; and (2) accrued interest on original loans, which is included with nonrevenue receipts as from counterbalancing transactions. The receipts included under this heading as rents are those derived from rents of real property belonging to investment, sinking, and public trust funds, and from other real property owned by the state not set apart for the use of any particular department.

Subventions and grants.—These receipts are gratuitous contributions made by one government to another, the term subventions being applied as the designation of such contributions as are received by a civil division with certain prescribed conditions, while the term grants is applied to those contributions which are made without the prior establishment of conditions.

Donations and gifts.—These receipts are gratuitous contributions made by private individuals and corporations to governments.

Earnings of general departments.—These receipts include fees and charges received by governments for services performed by their general departments, rents of real property controlled by their departments, amounts received from sales of old materials, and occasionally amounts from miscellaneous sources.

Earnings of public service enterprises.—These are the amounts received from the fees, charges, rates, tolls, and manufactures of those departments of government which are organized for the purpose of providing the public with some utility with the idea of receiving compensation therefor.

Nonrevenue receipts.—The term nonrevenue receipts is applied to all receipts of a civil division other than its revenue receipts as previously defined. The nonrevenue receipts of a fiscal year of any civil division comprise all receipts recorded during the year from (1) sales of investments and of supplies which have been purchased for sale; (2) issue of debt obligations and transactions which increase the indebtedness without the issue of formal debt obligations; (3) trust and agency transactions; (4) receipts offsetting outlays, as the collections of insurance to be applied to the reconstruction of destroyed property, refunds of erroneous payments, and receipts in error; and (5) such counterbalancing receipts as transfers between the funds or divisions of the governmental unit.

Primary classification of payments.—In the statistics herein presented the payments recorded in local accounts and reports are arranged in two primary classes, called governmental cost payments and nongovernmental cost payments.

Governmental cost payments.—The term governmental cost payments is applied to the payments by a civil division for its governmental costs, or for its expenses, interest, and outlays, less amounts which have been returned or are to be returned by reason of error or otherwise.

Classification of governmental costs.—The costs of government of a civil division for any fiscal year are the accrued costs, paid and payable, for the services employed, property constructed, purchased, or rented, public improvements constructed or otherwise acquired, materials utilized, and interest on borrowed moneys, which are incurred for administering the government, protecting person, property, and health, providing social necessities and conveniences, caring for the dependent and delinquent classes, bettering social conditions, performing other services, and carrying on other activities for which that civil division has authority. These costs are separable into three principal groups—payments for expenses, payments for interest, and payments for outlays.

Expenses.—In this class of governmental cost payments are included all payments for expenses which are (1) the costs, other than interest, from which no permanent or subsequently convertible value is received, including the costs of services employed, property rented, and materials consumed in the maintenance and operation of the government, the conduct of governmental undertakings, and the management of trusts; and (2) losses resulting from defalcation, bank failures, and other causes. Payments for expenses are divided into two principal classes—payments for the expenses of general departments and payments for the expenses of public service enterprises. The first class of payments is subdivided into those for the expenses of the principal divisions of the general departmental service.

Interest.—Interest is the designation of the accrued costs, paid or payable, incurred for the use of credit capital.

Outlays.—The term outlays is here applied to payments for land and other properties and public improvements, more or less permanent in character, which are constructed or acquired by civil divisions for use in the exercise of their functions or in connection with the business undertaken by them. Payments for outlays offset by receipts have been deducted from the outlay payments and included among the payments for nongovernmental costs as payments in counterbalancing transactions.

Nongovernmental cost payments.—The term nongovernmental cost payments is here applied to all payments of civil divisions other than their payments for expenses, interest, and outlays. These payments are arranged in five classes which are the converse of the five classes of nonrevenue receipts of which mention has previously been made.

Public properties.—Public properties is the designation applied by the Bureau of the Census in referring to land owned and used by a civil division for governmental purposes, to buildings and other more or less permanent structures on such land (other than such permanent structures as have a value in community use but not in exchange, as highway paving, sewers, etc.), and to furniture, tools, apparatus, and other equipment having a life in service of more than one year.

REVENUES AND EXPENDITURES OF THE NATIONAL GOVERNMENT: 1913 AND 1903.

TABLES 1, 2, AND 3.

The statistics of the financial transactions of the National Government for the fiscal years ending June 30, 1913, and June 30, 1903, are presented in Tables 1, 2, and 3. While these transactions are not absolutely analogous to those of the various lesser civil divisions, the statistics have been compiled, so far as feasible, in such a way as to make those relating to the same subject comparable.

TABLE 1.—In Table 1 are presented the cash balances at the beginning and close of the years mentioned, receipts classified as revenue and nonrevenue, and payments classified as governmental cost and nongovernmental cost.

TABLE 2.—Table 2 presents the revenue receipts and governmental cost payments of the National Government for the fiscal years 1913 and 1903.

Revenue receipts.—Receipts from governmental revenues are presented by kind of revenue from which derived.

Special property taxes.—The receipts shown as from special property taxes include customs receipts, the tax on circulation of national banks, and for the year 1903 a tax on legacies, in addition to other small receipts.

Poll taxes.—The receipts from poll taxes are derived from a head tax of $4 collected from each alien entering the United States.

Business taxes.—These receipts include all internal revenue collections on business other than the manufacture or sale of liquors, and for the year 1913 the tax on incomes.

Liquor licenses and other imposts.—Under this heading are included all receipts of the National Government that were derived from the manufacture and sale of liquors.

Other business licenses.—These receipts include those from liquor and trade licenses in Alaska which could not be segregated.

Interest and rents.—The receipts of this character for 1903 represent interest paid to the United States by the Central Pacific Railway on the notes of the company held by the Government, while those shown for 1913 are chiefly interest on Government deposits which drew no interest in the former year.

Earnings of general departments and miscellaneous.—These receipts include for both years all fees for services of United States officers, such as consular, land, patent, and naturalization fees; rents of public buildings and grounds; receipts from sales of materials; profit on coinage; and receipts of Navy pension, hospital, and clothing funds. In addition, the receipts for 1903 include the Spanish indemnity; and those for 1913 include the Chinese indemnity, contributions for river and harbor improvement, a reimbursement on account of expenditures made for Indian tribes, and forest reserve receipts.

Earnings of public service enterprises.—These receipts include for both years those on account of the Postal Service, and for the year 1913 certain receipts of the Panama Canal on account of rentals, work performed, etc.

Governmental cost payments.—Payments for the costs of government are classified in Table 2 as payments for expenses, interest, and outlays, those for expenses being further classified by branch of governmental service.

Expenses for general government.—These represent the expenses of the legislative, executive, and judicial branches of the Government and those for the administration of all departments of Government.

Expenses for protection to person and property.—These include the expenses for military and naval establishments which in 1903 represented nine-tenths of the total expense under this heading. In 1913, although this amount was larger than in the former year, it represented less than six-tenths of the total expenses classified under this heading. Among other expenses here tabulated are those for lighthouse establishment and boat inspection, Revenue-Cutter Service, Life-Saving Service, and immigration and naturalization, the last named showing the greatest increase in any one item over the corresponding amount in 1903.

Expenses for conservation of health and sanitation.—These payments include all expenses for the Public Health Service and those for the suppression of epidemic diseases. For 1903 this item includes an expenditure of $1,000,000 for the suppression of bubonic plague in Hawaii.

Expenses for highways.—For 1903 the only expense included under highways is that for rivers and harbors. For 1913 there is in addition a comparatively small expense for roads in Alaska, and roads and trails in certain states.

Expenses for charities, hospitals, and corrections.—Payments for pensions and maintenance of national soldiers' homes comprise the major part of the expenditures reported for charities, hospitals, and corrections.

Expenses for education.—This item includes expenses for the Military Academy and the Naval Academy, those for Indian schools, and certain others, such as those for the Library of Congress, and those for the study of animal and plant industry, and for seeds, and experiment stations under the Department of Agriculture.

Expenses for recreation.—These expenses were for national parks and museums.

Miscellaneous and general expenses.—The amounts shown under this heading comprise such payments for expenses as could not be classified under the other headings.

Expenses for public service enterprises.—These payments represent expenses for the Postal Service.

Interest.—The amount here shown represents the interest paid on the public debt, and for 1913 includes a small amount paid on certain Indian trust funds.

Outlays.—The payments shown for outlays for both years were for public buildings and grounds, military posts, and for the Naval Bureau, in addition to which for 1913 there is included an outlay of $41,741,258 for the Panama Canal.

TABLE 3.—This table presents a brief summary of those receipts and payments which are designated by the Bureau of the Census as nonrevenue receipts and nongovernmental cost payments.

Nonrevenue receipts.—These receipts are classified as follows: (1) From sales of investments and supplies, the principal item of which is sales of public lands; (2) from issue of debt obligations; (3) from trust and agency transactions, which include District of Columbia receipts (agency accounts), sale of Indian lands, and such other transactions as are in the nature of trust or agency transactions; (4) from counterbalancing transactions, which are moneys erroneously collected, and receipts in correction of erroneous payments, receipts offset by outlay payments, etc.

Nongovernmental cost payments.—These payments are the converse of the nonrevenue receipts enumerated above.

REVENUES AND EXPENDITURES OF STATES: 1913 AND 1903.

TABLES 4 AND 5.

Summary of receipts, payments, and cash balances of states: 1913 and 1903.—Table 4 presents the total receipts and payments of each of the 48 states for the fiscal period ending June 30, 1913, or the nearest date prior thereto, and the cash balance of each state at the beginning and close of the fiscal period. The same information for the fiscal period ending June 30, 1903, or the nearest date prior thereto, is set forth in Table 5. The amount given for 1913 in each case is for a fiscal period of one year, the data of states not issuing annual reports having been procured directly from official records. The data for 1903, on the other hand, were taken wholly from the printed reports of the respective states as given in the report on "Wealth, Debt, and Taxation" for 1903. In the case of Arkansas, Colorado, Idaho, Illinois, Iowa, Montana, Nebraska, North Dakota, Oklahoma, Tennessee, Washington, and Wyoming, those reports covered fiscal periods of two years, while in the case of Oregon the fiscal period covered 21 months. This fact mars the comparability of the figures for the totals and for the states mentioned.

Receipts and payments: 1913 and 1903.—In Tables 7, 9, and 15, one-half of the receipts and payments of the states having biennial periods and four-sevenths of those reported for Oregon are given. By substituting the amounts in those tables for the amounts carried in the columns headed "Revenue," "Nonrevenue," "Governmental cost," and "Nongovernmental cost," respectively, of Table 5, and thereby eliminating as far as possible the noncomparability which exists between that table and Table 4, a more intelligent comparison can be made between the transactions of the two years. Only two states—Michigan and South Carolina—fail to show an increase in the total receipts and payments of 1913 over those of 1903. In the case of Michigan the revenue receipts are almost doubled and the governmental costs increased 113.9 per cent. The decrease in the total arises from the decrease in the amount of the general transfers reported for the two years, and no significance can be attached thereto. The decrease in the receipts and payments of South Carolina, on the other hand, is found to be among the revenue receipts and the governmental cost payments. It is due to the large decrease in the revenues and the expenditures of the liquor dispensary which is operated as a public service enterprise by the state. In 1913 the receipts from this source were $42,096, as against $2,282,293 in 1903, and the payments for this purpose decreased from $2,068,795 in 1903 to $6,376 in 1913. This decrease was great enough to be reflected in the total receipts and payments of the two years.

The revenue receipts of the 48 states increased from $189,165,067 in 1903 to $367,585,331 in 1913, an increase of 94.3 per cent, as shown in Table 13. The governmental cost payments of the 48 states increased from $185,764,202 in 1903 to $382,551,199 in 1913, or 105.9 per cent.

Cash balances: 1913 and 1903.—The amounts in the columns headed "Cash balances at close of year," in Tables 4 and 5, represent the cash in the treasuries of the 48 states on June 30, 1913, and June 30, 1903, or the nearest dates prior thereto on which the fiscal years closed. The amount of cash on hand is subject to natural change, and no especial significance attaches to the increase of cash in the treasuries.

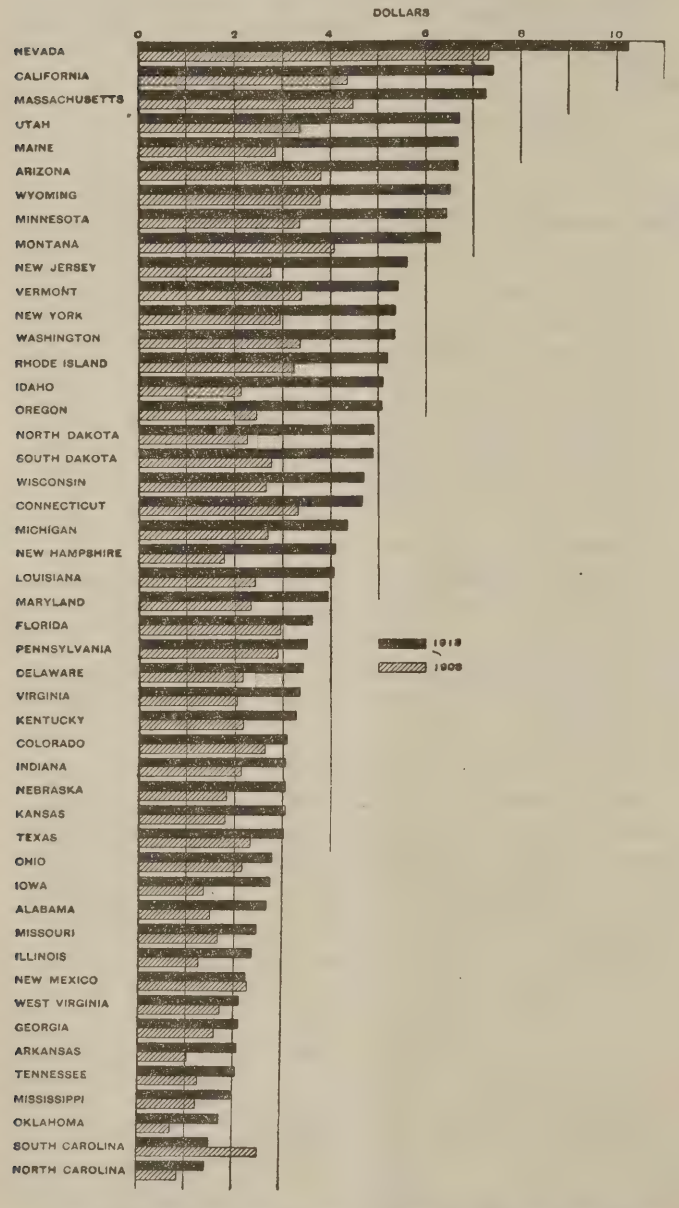
TABLES 6 AND 7.

Revenue receipts of states, total and per capita: 1913 and 1903.—An examination of the figures of Tables 6 and 7 will disclose the great difference in the relative and comparative importance of the several sources of state revenues for 1913 and 1903.

General property taxes.—General property taxes constitute the most important single source of revenue. In 1903, with the exception of Delaware, every state and territory supported its government in a large measure by receipts from general property taxes. In 1913 no collections of such taxes were reported by Connecticut or Delaware. In neither of these states, however, has the right to levy this class of taxes been

relinquished by the state. The following states show a decrease in their receipts from general property taxes and a corresponding increase in those from special property or business taxes: California, Ohio, Pennsylvania, New York, Vermont, and West Virginia. The decrease in the receipts from the general property tax of California was sufficiently large to affect the total receipts of the Pacific states.

DIAGRAM 1.—PER CAPITA REVENUE RECEIPTS OF STATES: 1913 AND 1903.



The per capita receipts of the 48 states from general property taxes in 1913 were $1.44, varying from $0.15 in Pennsylvania to $6.35 in Nevada. In 1903 the per capita for all the states and territories was $1.02, the smallest per capita, $0.17, being reported by Connecticut, and the largest, $4, by Nevada.

Special property taxes.—During the fiscal year 1913 the receipts from special property taxes by the states aggregated $67,675,933, which is 48.4 per cent of the receipts from general property taxes of that year. Receipts from this source were reported by 45 states and in one other (North Dakota) an inheritance tax is in force, no receipts therefrom being reported in 1913. In 1903 these taxes were a source of revenue in 30 states and aggregated $24,990,100, which is 30.4 per cent of the general property taxes collected in that year. The per capita receipts from this tax increased from $0.31 in 1903, to $0.70 in 1913, the largest per capita increase being found in the case of Vermont.

Among the receipts from special property taxes are included those from the inheritance tax. In the strictest interpretation the inheritance tax is not a property tax, being rather a tax on the transfer of property, but it has been classified as a special property tax in this bulletin, since it resembles that class of tax more closely than any other.

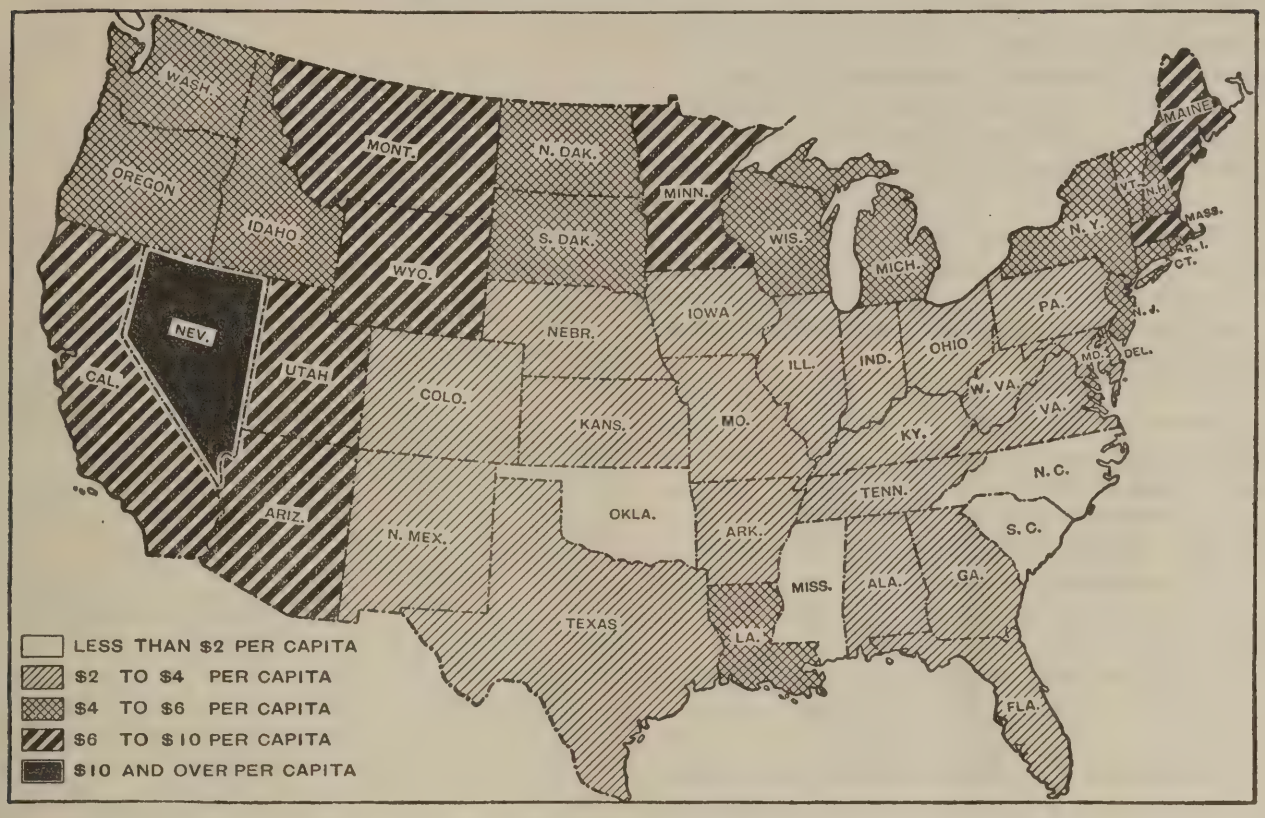
The statement which follows shows those states which reported receipts from the inheritance tax, and the amounts reported, for the years 1913 and 1903.

STATE.	THE INHERITANCE TAX.		STATE.	THE INHERITANCE TAX.	
	1913	1903		1913	1903
Total	$26,470,964	$7,038,684	Montana	$8,959	$36,331
			Nebraska		32
Arizona	173		New Hampshire	173,415	
Arkansas	23,665	302	New Jersey	748,086	149,577
California	1,586,875	290,447	New York	12,153,189	3,303,555
Colorado	224,406	269	North Carolina	5,265	4,241
Connecticut	1,080,483	335,935	Oklahoma	4,865	
Delaware	8,381	978	Ohio		13,055
Idaho	5,036		Oregon	74,269	2,229
Illinois	1,612,818	503,816	Pennsylvania	2,064,300	1,231,706
Iowa	280,733	117,332	South Dakota	9,781	
Kansas	170,234		Tennessee		35,689
Kentucky	99,224		Texas	47,574	
Louisiana	207,004		Utah	242,800	1,639
Maine	275,318	39,877	Vermont	78,593	29,440
Maryland	289,332	83,780	Virginia	43,392	16,266
Massachusetts	2,154,407	433,710	Washington	186,231	1,524
Michigan	360,898	164,683	West Virginia	168,234	6,340
Minnesota	678,455	6,077	Wisconsin	924,736	
Missouri	479,517	229,854	Wyoming	316	

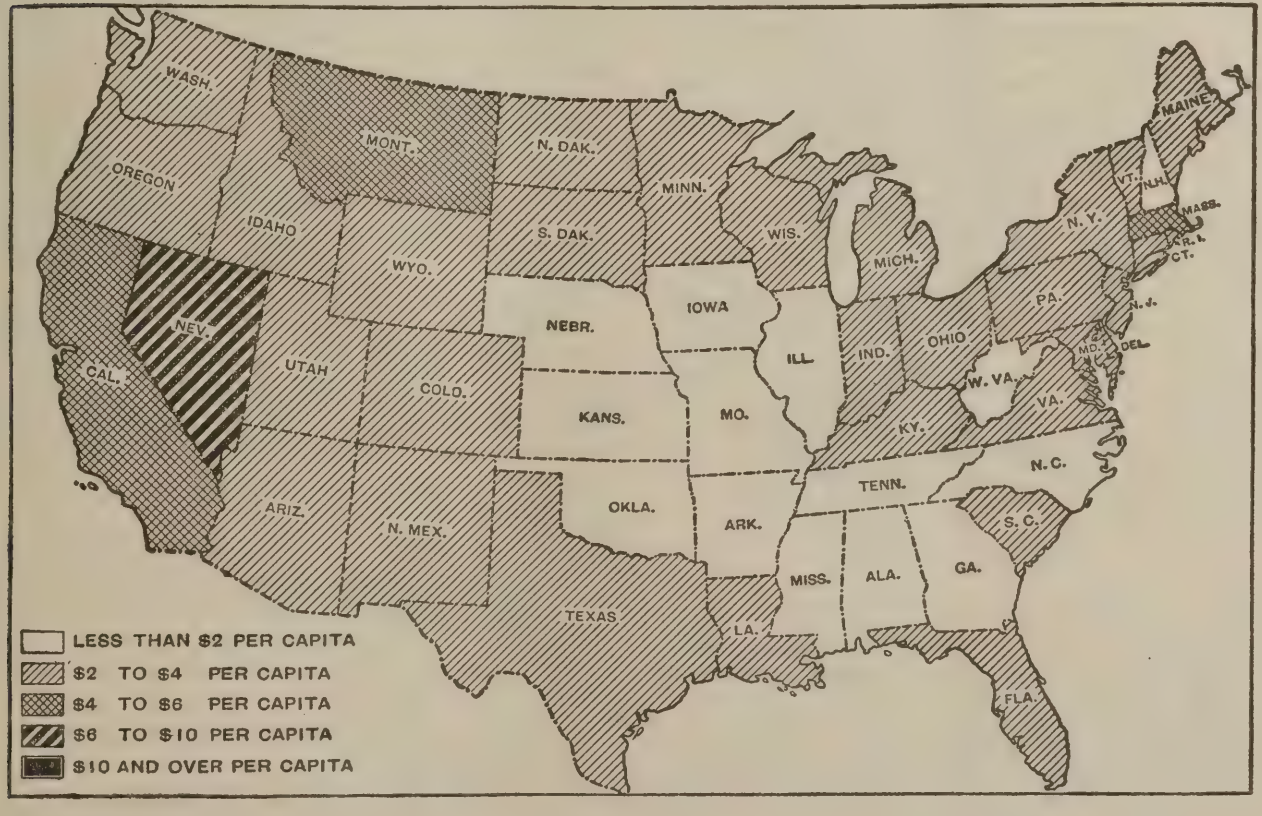
In the column "Special property taxes" of Tables 6 and 7 have been tabulated, in addition to the receipts from the inheritance taxes as set forth above, all receipts from (1) taxes on the capital stock or corporate excess of building and loan associations and insurance, telegraph and telephone, express, sleeping car, and other companies; (2) certain taxes on investments, mortgages, and secured debt; (3) taxes on litigations and transfer of realty; and (4) taxes on commissions of executors and civil officers.

Poll and occupation taxes.—In 1913 poll and occupation taxes were a source of revenue in 10 states; the amounts collected in Indiana and North Carolina, however, are included in the column "General property taxes." Eleven states received revenue from this class of taxes in 1903. In several states not reporting receipts from poll and occupation taxes such taxes are authorized, but are collected and disbursed by counties, usually for school purposes, and no record of their collection is found in the state reports.

MAP 1.—PER CAPITA REVENUE RECEIPTS OF STATES: 1913.



MAP 2.—PER CAPITA REVENUE RECEIPTS OF STATES: 1903.



Special assessments and special charges for outlays.—In 1913 five states—Florida, Idaho, Louisiana, Maine, and Massachusetts—reported receipts from special assessments and special charges for outlays. In 1903 two states—Louisiana and Massachusetts—reported receipts of this nature. Among the receipts tabulated as special assessments are certain collections made for drainage, assessments for the maintenance of levees, and assessments for fire protection in forests. In the case of Massachusetts the receipts tabulated as special assessments are collections made by the commonwealth from the cities and towns by reason of the metropolitan park, sewer, and water loans, and loans for state highways, armories, etc.

Business and income taxes.—In 1913 business taxes were collected in all states except Nevada. In 1903 Oklahoma alone reported no receipts from this class of taxes. A large increase in the amounts of business taxes reported will be noted in the aggregate collections, in the totals given for the geographic divisions, and in the amounts given for the individual states, except Arkansas, Arizona, Colorado, Michigan, Nevada, New Jersey, Utah, and Vermont.

The per capita receipts from business taxes collected without the issue of licenses were $0.55 in 1913, and $0.34 in 1903.

The statement which follows shows those states which reported receipts from business taxes on insurance companies, and the amounts reported for the years 1913 and 1903.

STATE.	INSURANCE TAXES.		STATE.	INSURANCE TAXES.	
	1913	1903		1913	1903

Missouri	624,578	164,825			

[1] Not reported separately.

Included in business and income taxes are receipts from the income tax reported by four states in 1913, which amounted to $313,616, and those reported by three states in 1903, which amounted to $78,786.

The Mississippi income tax law did not become operative soon enough to produce revenue in the year reported, and the Massachusetts law taxes incomes as personal property. The states reporting receipts from income taxes in 1913 and 1903 and the amounts reported are shown in the following statement:

STATE.	INCOME TAX.	
	1913	1903
Total	$313,616	$78,786
North Carolina	(1)	18,352
Oklahoma	3,978	.....
South Carolina	14,098	414
Virginia	134,562	60,020
Wisconsin	160,978	.....

[1] Not reported separately.

In the column "Business and income taxes" have been tabulated, in addition to the insurance and income taxes as set forth above, all receipts from (1) the taxes on the gross earnings of express, telegraph and telephone, sewing machine, mining, oil, railway, car and other companies, and building and loan associations; (2) the tax on savings banks; and (3) the taxes on options and the transfer of stocks.

Liquor licenses and other imposts.—In 1913, for the 48 states as a whole, the per capita receipts from liquor licenses were $0.21 as against $0.12 in 1903. Receipts from this source were reported in 1913 for the following states which had no receipts from liquor licenses in 1903: Arizona, Louisiana, Michigan, Minnesota, Nevada, Tennessee, and West Virginia; while for Georgia, North Carolina, and Wyoming such receipts were reported in 1903 and not in 1913. For Georgia the receipts from the locker tax are included in 1913 with those from other business licenses. Receipts from the dispensaries in South Carolina are included in the column of earnings of public service enterprises. The receipts from liquor licenses in Montana for 1913 and in Texas for 1903 were not separable from those collected from licenses for business other than liquor.

Other business licenses.—In 1913 receipts from licenses issued for business other than liquor were reported by 42 states as against 40 states in 1903. The amount of such receipts, however, decreased for the 48 states as a whole.

Nonbusiness license taxes.—In 1913 receipts from nonbusiness licenses were reported by 43 states as against 9 in 1903. The receipts so classified are in most instances those from hunting, fishing, and automobile licenses. The large increase which will be noted in the total and per capita amounts carried in the column "Nonbusiness licenses" is due largely to the more general licensing of automobiles by the states.

Fines, forfeits, and escheats.—In the table for 1913 the amounts reported as received from fines, forfeits, and escheats are in excess of those reported for 1903. In 1913 such receipts are shown for 44 states; in 1903, for 29 states.

Highway privileges.—No receipts from this source were reported for either year.

Interest and rents.—An increase of $10,358,427 will be noted in the amounts shown as interest and rents

in Tables 6 and 7. In the table for 1913 receipts from this source are shown for all states; in the table for 1903, for 45 states. Almost one-half of the increase mentioned is shown for 4 states. These states and amount of increase for each are as follows: New York, $1,884,144; North Dakota, $1,270,094; Minnesota, $928,471; and Texas, $713,589.

Subventions and grants.—In 1913 receipts from subventions and grants were reported by 41 states, as against 35 states in 1903. The receipts classified as from subventions and grants represent in every instance amounts received by the states from the National Government in aid of agriculture, education, experiment stations, and highway construction and maintenance.

Donations, gifts, and pension assessments.—In 1913 there were 13 states which reported receipts from donations and gifts. In 1903 such receipts were reported for 4 states. In the majority of cases the amounts so classified were gifts for the establishment or enlargement of trust funds.

Earnings of general departments and miscellaneous.—Under "Earnings of general departments and miscellaneous" are included all fees and charges of the state departmental offices, the income of prison enterprises, and receipts of such unusual nature as to make a more definite classification impossible. A large increase will be noted in the amounts for the 48 states and for the several geographic divisions. For 4 states, however, a slight decrease will be found.

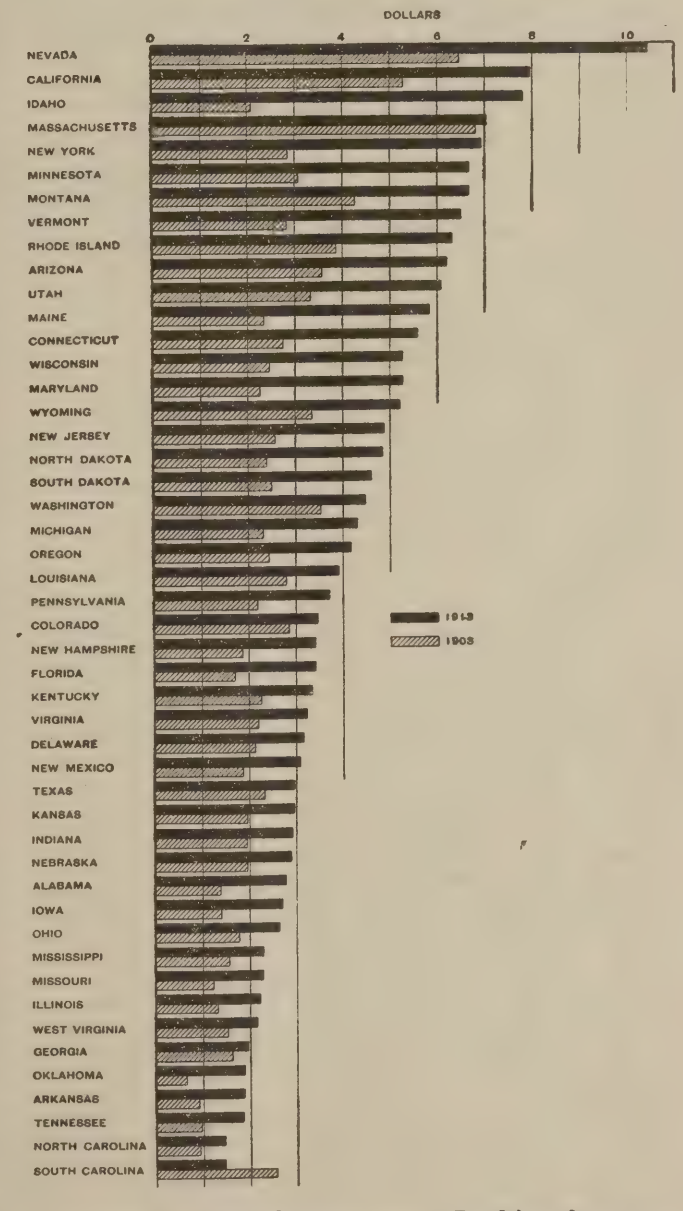
Earnings of public service enterprises.—A decrease of $1,468,133, or $0.02 per capita, will be noted in the earnings of public service enterprises. This is due largely to the falling off of the dispensary revenues of South Carolina. Nine states reported the operation of industries established primarily for serving the public with some utility for profit in 1913. Those states and the enterprises conducted by them are as follows: California, the docks and wharves of San Francisco; Connecticut, a toll bridge; Maryland, hay scales and wharves; Massachusetts, a water-supply system; New York, the state canals; North Dakota, the state hail insurance business; Ohio, the state canals; Oregon, a portage railway; and South Carolina, the state insurance business and the state dispensary.

Tables 8 and 9.

Governmental cost payments of states, total and per capita: 1913 and 1903.—Tables 8 and 9 give for 1913 and 1903, respectively, the payments, total and per capita, of the 48 states for the expenses of general departments and of public service enterprises, for interest, and for outlays. A comparison between the amounts of payments for the two years, with the per cent of increase, may be found in Table 13.

In Tables 8 and 9 the expenses of the general departments have been segregated into nine principal groups. In the table for 1903 the column "Schools" includes apportionments for education shown separately for 1913, and the column "Highways" doubtless includes certain payments which should be treated as apportionments. The amounts of apportionments given in the column "All other," in Table 8, with the exception of those for California and Oklahoma, are composed mostly of highway apportionments. In the case of California the amount included in this column represents the state's reimbursement to the counties for the loss of their revenues from ad valorem and railroad taxes; and in the case of Oklahoma the entire amount was apportioned to the counties for fire protection.

Diagram 2.—Per Capita Governmental Cost Payments of States: 1913 and 1903.



Expenses for general government.—In this column are reported the payments for the expenses of the legislative, general executive, and judicial branches of the state governments, including the maintenance of their

general government buildings. Under the general executive branch are included the offices of governor, comptroller, auditor, treasurer, assessors, and collectors of revenue, etc.

Expenses for protection to person and property.—Among expenses for protection to person and property are reported the payments for maintaining state armories and arsenals.

Expenses for conservation of health and sanitation.—These payments are in the majority of cases for the suppression of tuberculosis.

Expenses for highways.—In this column are reported all expenses by the states for the upkeep of public roads and waterways. For 1903 all amounts apportioned by the states to their lesser civil divisions for these purposes are included in the column "Highways." For 1913 the amounts apportioned are included in the column "All other," under "Apportionments."

Expenses for charities, hospitals, and corrections.—Payments for the maintenance of charitable and correctional institutions of the state, including hospitals other than those for contagious diseases, soldiers' and orphans' homes, reform schools, penitentiaries, etc., are here included.

Expenses for schools.—In this column in Table 8 are included only those payments made directly to educational institutions and objects by the states. The amounts apportioned to the lesser civil divisions to be used for the support of schools are included in the column "Apportionments." The amount paid over to a state institution by the state does not necessarily represent the total amount expended, as the institutions may have other sources of revenue. Effort has been made to show only such expenditures for educational purposes as were made directly from the state treasury. All payments for agricultural demonstrations and instruction expenses financed by the state for fairs and exhibits and for the preservation of historic records have been treated as expenses for schools. In the table for 1903 no separation of apportionments and direct payments to schools was attempted.

Expenses for libraries.—The expenses of law and departmental libraries are included with the expenses of the department to which they belong. The only amounts included in the column "Libraries" are the expenses of the traveling library commissions.

Expenses for recreation.—The payments under this heading include those amounts expended by the states for the maintenance of public parks, museums, and monuments.

Miscellaneous and general expenses.—The greater portion of this expense was for state printing and insurance, which could not be distributed to the several departments.

Expenses for public service enterprises.—In 1903 three states reported public service enterprises. For California, the docks and wharves of San Francisco were reported; for Ohio, the state canals; for South Carolina, the state dispensary. In 1913 payments for expenses of public service enterprises were shown by eight states. These states were, besides the three mentioned above, Maryland, Massachusetts, New York, North Dakota, and Oregon, and such payments are the converse of receipts reported in Tables 6 and 7. Illinois owns a canal, but no payment for the expenses of such enterprise is reported for that state, as a canal commission controls the finances of the enterprise and its records are not incorporated in the state accounts. The payments for the toll bridge in Connecticut could not be segregated and are included with those for highways.

Payments for interest.—The interest payments shown in this column include the payments by states for the use of borrowed capital. No attempt was made to classify the interest payments of states according to the kind of debt obligations upon which paid.

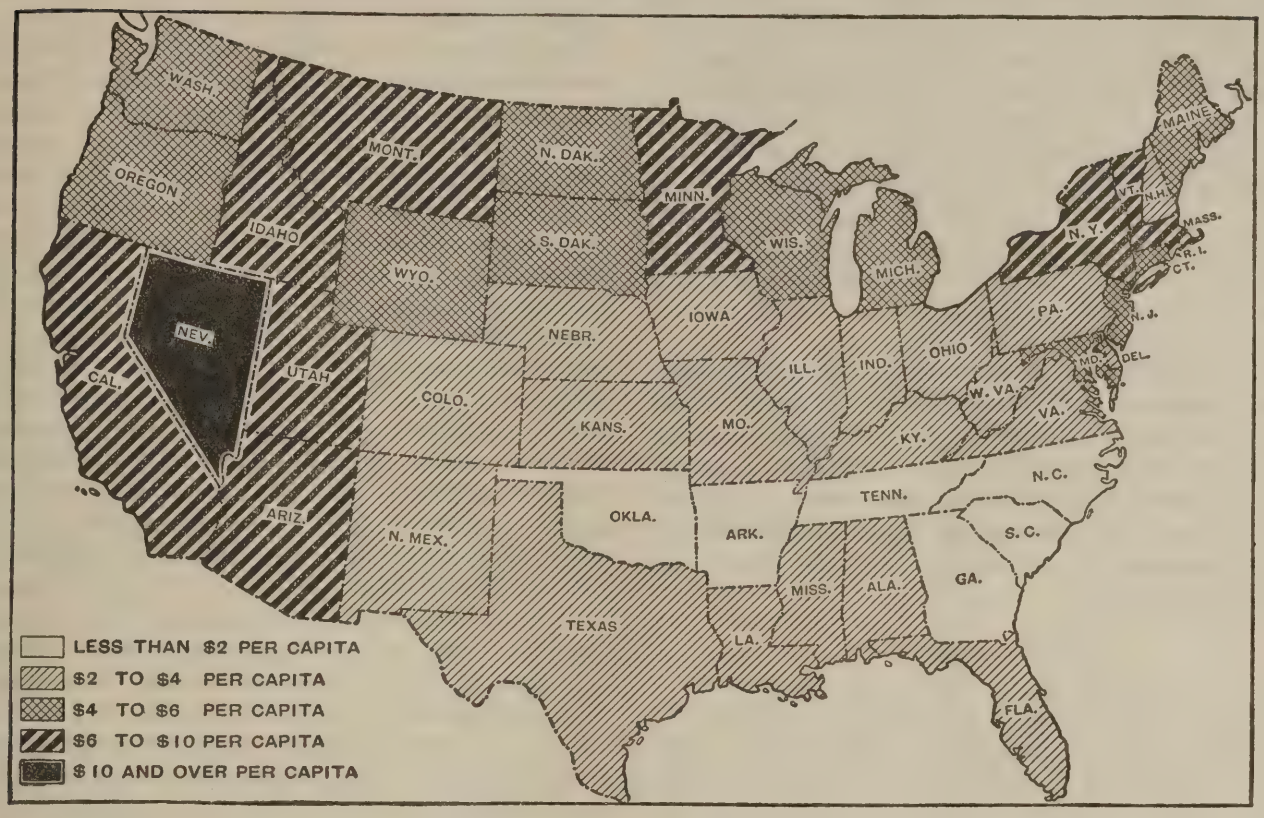
Payments for outlays.—In this column are included the payments of states for the acquisition or construction of permanent properties and improvements. Table 10 gives the detail for 1913, but the detail for 1903 is not available.

Comparison of per capita payments for governmental costs.—A comparison of Tables 8 and 9 reveals an increase in the per capita payments for governmental costs in 1913 for the 48 states as a whole and for the individual states, except South Carolina. The per capita payments of this state decreased from $2.55 in 1903 to $1.46 in 1913, a difference of 70 per cent, due to the decrease in payments for expenses of the state dispensary. Taking the states as a whole, the expenses of the general departments increased from $2.12 to $3.27 per capita, an increase of 54 per cent, and an increase in this item of governmental cost is found in each state, except Massachusetts. An increase is shown in the per capita payments for expenses in each subdivision of the general departmental service, except in the payments for health and sanitation and those for recreation, which remain unchanged, and for general and miscellaneous objects, which show a decrease. Comparing the per capitas for schools in 1913 with those for 1903, it is necessary to include the per capita payments in the column of Table 8 showing apportionments for education. The per capita payments for expenses of public service enterprises of the states as a whole remain the same for the two years; those for interest increase from $0.12 to $0.15; and those for outlays, from $0.03 to $0.50. This increase in outlays may be largely accounted for by better classification in 1913.

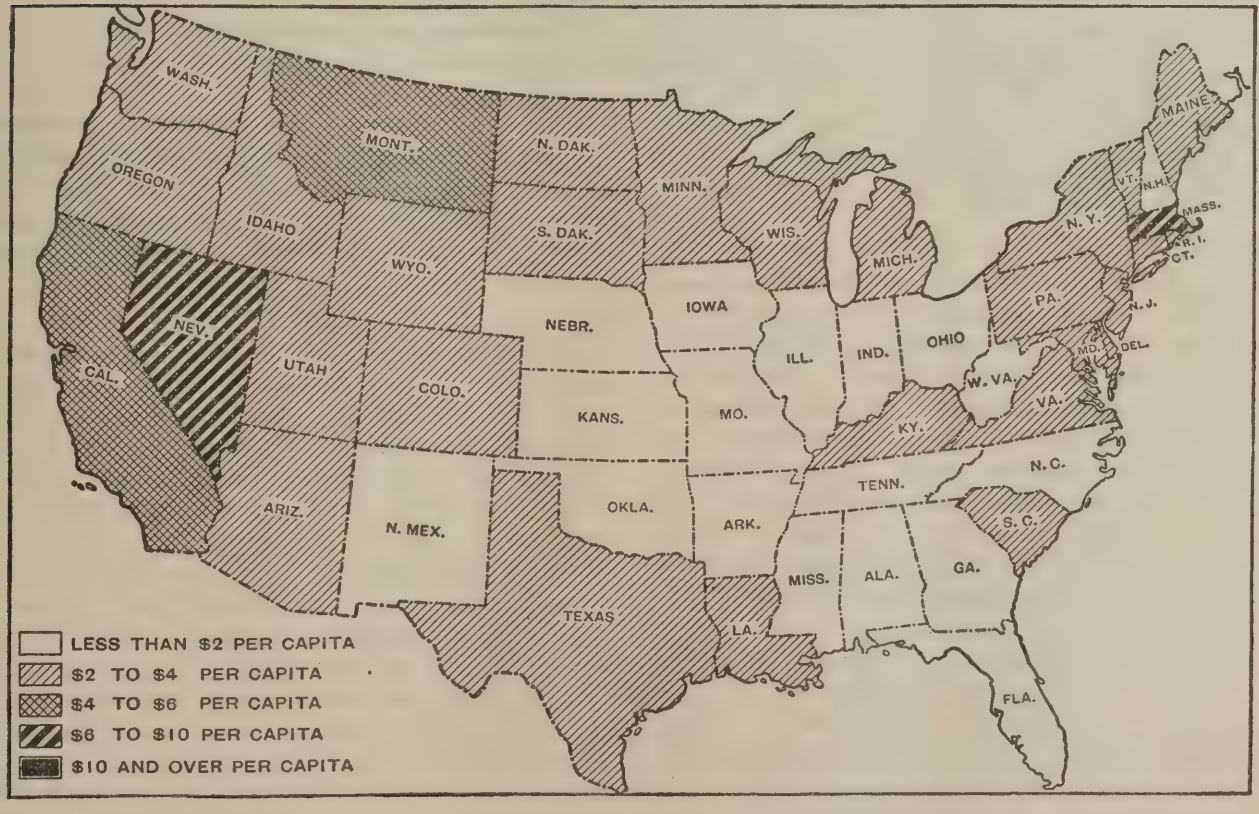
TABLE 10.

Governmental cost payments for outlays: 1913.—The total of the payments for outlays for the 48 states for 1913 is $48,433,678. This amount should be considered in connection with the fact that the excess of revenue receipts over the payments for expenses and interest and applicable to outlay in 1913 was $33,467,810 and with the fact that the excess of receipts which increased state indebtedness (Table 14) over payments which decreased state indebtedness (Table 14) was $41,410,754.

MAP 3.—PER CAPITA GOVERNMENTAL COST PAYMENTS OF STATES: 1913.



MAP 4.—PER CAPITA GOVERNMENTAL COST PAYMENTS OF STATES: 1903.



The amounts shown in the column "Protection to person and property" are payments by the states for such purposes as the purchase, construction, or improvement of encampment grounds and equipment of state guards and outlays for protective commissions. The amounts shown in the column "Miscellaneous and general" represent expenditures for land reclamation.

Outlays for public service enterprises were reported by three states. In California the amount given represents the payment for the improvement of harbor property; in New York, the enlargement and construction of canals; and in Massachusetts, the extension of the metropolitan water system.

No detail of outlays for 1903 could be obtained. The total amount expended for outlays in that year was $2,141,915, but neither the individual items in this column nor the total represents the full expenditures for outlays, for the reason that it was not possible in the preparation of the former report to obtain a complete separation of payments for outlays from those for expenses.

TABLES 11 AND 12.

Per cent distribution, by principal classes, of revenue receipts and governmental cost payments of states: 1913 and 1903.—These tables show, for the 48 states and for the geographic divisions, the per cent which the receipts from each class of revenues constitute of the total revenue, the per cent which the payments for each of the principal classes of governmental costs constitute of the total of such payments, and the per cent relation of the total revenue receipts to the several classes of governmental cost payments. The percentages for 1913 have been in all cases computed upon the basis of the receipts and payments shown in Tables 6 and 8, and those for 1903 upon the amounts given in Tables 7 and 9.

Per cent distribution of revenue receipts.—In 1913 taxes constituted 81.6 per cent of the total revenues of the 48 states. The percentages from this source of revenue for the several geographic divisions varied from 68.8 in the West North Central division to 91.1 in the Middle Atlantic division. The only states realizing only 60 per cent or less of their revenues from taxes were North Dakota, South Dakota, Montana, and Wyoming. In 1903 taxes constituted 81.9 per cent of the total revenues, only 4 states—Florida, Massachusetts, South Carolina, and South Dakota—realizing less than 60 per cent from this source. In 1913 and 1903 the proportions borne to the total per cent of revenue represented by property, poll, occupation, and business taxes were similar. In the individual states for both years the proportional distribution of the classes of taxes given varied greatly. For the 48 states as a whole the per cent of total revenue receipts represented by the general property taxes decreased from 43.5 per cent in 1903 to 38 per cent in 1913, this decrease being almost entirely offset by the increase in the proportion of receipts from special property taxes.

Per cent relation of revenue receipts to governmental cost payments.—In the columns of Tables 11 and 12 headed "Per cent required for meeting expenses and interest" and "Per cent available for outlays and other purposes" is shown the proportion existing between the revenue receipts of states and the necessary costs of government known as expenses and interest and the per cent of revenues remaining after these expenses were met. In 1913 of the total revenue receipts of the 48 states, 90.9 per cent was required for meeting expenses and carrying interest charges, and the balance, 9.1 per cent, was available for outlays and other purposes. The states in 1913 with the lowest percentage of their revenue receipts required for meeting their expenses and interest, and, accordingly, having the largest percentage to apply to permanent improvements, were Arizona, Wyoming, New Hampshire, Oregon, and Washington. In no one of the five states mentioned was the per cent of revenue applicable to outlay less than 23.2, and for Oregon the per cent was 37.1.

In 1903 the 48 states as a whole had 2.9 per cent of revenues remaining after meeting their expenses and interest, the states having the largest percentage available for outlays being Florida, Missouri, New Mexico, Pennsylvania, and Tennessee. The per cent of revenues applicable to outlay costs in the five states mentioned varied from 22.6 in Tennessee to 46.7 in Florida.

The revenues of 11 states in 1913 and of 15 states in 1903 were less than their payments for expenses and interest.

Per cent distribution of governmental cost payments.—The per cent distribution of governmental cost payments in 1913 is slightly different from that in 1903. This fact is due, in a great part, to the imperfect segregation of payments for outlays in 1903 from those for expenses.

TABLE 13.

Population, revenue receipts, and governmental cost payments of states, with per cent of increase: 1913 and 1903.—Of the 48 states as a whole, the population increased 20 per cent, the receipts from revenues 94.3 per cent, and the governmental cost payments 105.9 per cent. The increase in receipts from property taxes was 93.3 per cent. A decrease in this class of receipts is shown for California, Delaware, and Ohio. The increase in the receipts from business taxes and business licenses, other than on the manufacture and sale of liquors was 74.1 per cent. Each class of governmental cost payments increased, if the 48 states be considered as a whole, though individual states will be found to show an increase in one class and a decrease in another. The per cent of increase for outlays, for a number of states, is in error because of outlays being imperfectly reported for 1903.

TABLES 14 AND 15.

Nonrevenue receipts and nongovernmental cost payments of states: 1913 and 1903.—In the columns of Tables 14 and 15 showing receipts from sales of investments and supplies are included receipts of states from the sale of their public lands, securities, and other investments. In 1913 the total receipts from such sales were $27,648,759, a decrease of $1,866,756, or 6.3 per cent, from the total of such receipts in 1903.

The amounts given as received from the issue of debt obligations represent those receipts which increased the indebtedness, including receipts from the sale of bonds and other long-term debt obligations, revenue loans, indebtedness to public trust funds, and warrants outstanding at the close of the year. The total of such receipts in 1913 was $77,906,436, an increase of $60,011,961, or 335.4 per cent, over such receipts in 1903. This increase in the indebtedness of states has greater significance when considered in connection with the amounts shown in the same tables as paid for the decrease of such indebtedness. For 1913 Table 14 shows that $36,495,682 was paid for this object as against $17,568,933 in 1903, as given in the corresponding column in Table 15. This difference represents an increase of $18,926,749, or 107.7 per cent. For eight states for 1913 and four states for 1903 no transactions affecting indebtedness were reported. The state showing the greatest decrease in its outstanding obligations in 1913 is Pennsylvania. The state which shows the greatest increase in its indebtedness in 1913 is California. The state which shows the largest increase in the amount of its debt obligations in 1903 is Massachusetts, while the state which shows the largest decrease is Pennsylvania.

The amount of counterbalancing receipts in 1913 was $1,441,082, while the amount of corresponding payments was $1,422,227. This difference arises from the fact that for Tennessee the amount received from the sale of real property and credited to outlay account was in excess of the total amount expended for outlays during the year for the object to which the receipt has been credited.

In the columns "By general transfers" of Tables 14 and 15 are included the receipts and payments between independent divisions and funds. Where the fiscal periods of the divisions and funds are the same, such receipts and payments balance.

TABLE 16.

Value of public properties of states: 1913.—Except for the omission of the figures for Pennsylvania, Table 16 gives an exhibit of the value of public properties of states. The figures of this table were derived either from actual property records or from reliable estimates, and footnotes indicate the omission of values where no such estimates were procurable. No comparison is possible between the values for 1913 and those for 1903, for the reason that no data for 1903 were obtainable.

The detail of the amounts reported in the column "All other" of this table is as follows: The commonwealth flats of Massachusetts, amounting to $5,000,000; governors' mansions in 11 states, $1,238,296; forest reserves and the property of forestry boards in 9 states, $4,485,333; fish hatcheries, game farms, and equipment of fish and game commissions in 15 states, $683,908; printing departments in 2 states, $290,832; electric light and heating plants in 2 states, $190,000; equipment of highway departments in 4 states, $110,047; laboratories in 2 states, $49,015; mine-rescue and life-saving stations in 2 states, $82,620; property of various boards and commissions in 10 states, $341,761; and miscellaneous lands and buildings in 3 states, $363,200.

GENERAL TABLES

TABLE 1.—SUMMARY OF RECEIPTS, PAYMENTS, AND CASH BALANCES OF THE NATIONAL GOVERNMENT: 1913 AND 1903.

[For a text discussion of this table, see page 20.]

	1913	1903		1913	1903
Aggregate of receipts and cash balances	$3,891,501,454	$2,566,878,140	Aggregate of payments and cash balances	$3,891,501,454	$2,566,878,140
Cash balances at beginning of year	1,841,687,848	1,221,259,600	Cash balances at close of year	[1] 1,893,628,805	1,310,006,031
Revenue receipts	953,596,637	657,231,950	Governmental cost payments	952,600,857	616,739,361
Nonrevenue receipts	1,096,216,969	688,386,590	Nongovernmental cost payments	1,045,271,792	640,132,748

[1] Including excess of postal receipts, $4,510,651.

TABLE 2.—REVENUE RECEIPTS AND GOVERNMENTAL COST PAYMENTS OF THE NATIONAL GOVERNMENT: 1913 AND 1903.

[For a text discussion of this table, see page 20.]

	1913	1903		1913	1903
Revenue receipts	$953,596,637	$657,231,950	Governmental cost payments	$952,600,857	$616,739,361
Special property taxes	313,953,234	281,512,436	Expenses of all general departments	598,857,357	433,924,329
Poll taxes	4,720,728	1,356,158	General government	61,783,733	59,664,164
Business taxes	113,384,816	42,064,142	Protection to person and property	264,670,696	175,874,973
Liquor licenses and other imposts	230,146,332	179,501,319	Conservation of health and sanitation	5,700,620	2,533,009
Other business licenses	205,907	83,625	Highways	42,651,775	19,590,082
Fines, forfeits, and escheats	2,444,025	834,032	Charities, hospitals, and corrections	182,313,240	146,918,690
Interest and rents	44,103	997,198	Education	17,242,816	10,341,203
Earnings of general departments and miscellaneous	17,993,561	16,657,697	Recreation	923,801	504,606
Earnings of public service enterprises	270,703,931	134,224,443	Miscellaneous and general	13,372,439	12,850,248
			Apportionments	10,198,237	5,647,354
			Expenses of public service enterprises	264,106,982	137,695,010
			Interest	25,256,180	28,556,349
			Outlays	64,380,338	16,563,673

TABLE 3.—NONREVENUE RECEIPTS AND NONGOVERNMENTAL COST PAYMENTS OF THE NATIONAL GOVERNMENT: 1913 AND 1903.

[For a text discussion of this table, see page 20.]

	1913	1903		1913	1903
Nonrevenue receipts	$1,096,216,969	$688,386,590	Nongovernmental cost payments	$1,045,271,792	$640,132,748
From sales of investments and supplies	3,558,788	12,992,662	For purchase of investments and supplies		
From issue of debt obligations	1,059,082,850	650,997,423	For redemption of debt obligations	1,011,251,811	616,548,659
From trust and agency transactions	20,145,349	9,813,240	In trust and agency transactions	20,589,999	9,000,824
From counterbalancing transactions	13,429,982	14,583,265	In counterbalancing transactions	13,429,982	14,583,265

TABLE 4.—SUMMARY OF RECEIPTS, PAYMENTS, AND CASH BALANCES OF STATES: 1913.

[For a text discussion of this table, see page 21.]

STATE.	Cash balances at beginning of year.	RECEIPTS.			Aggregate of receipts and cash balances at beginning of year.[1]	PAYMENTS.			Cash balances at close of year.
		Total.	Revenue. (Table 6.)	Nonrevenue. (Table 14.)		Total.	Governmental cost. (Table 8.)	Nongovernmental cost. (Table 14.)	
TOTAL	$117,176,715	$526,646,835	$367,585,331	$159,061,504	$643,823,550	$506,847,940	$382,551,199	$124,296,741	$136,975,610

[1] No data for 1903.
[2] Includes valuation of county property belonging to the state.
[3] No estimate.
[4] No data for this state.
[5] Located in the capitol.
[6] Valuation of the state's canal. No transactions of this enterprise are shown in the tables of this bulletin, for the reason that the state treasurer does not include such transactions in his report.
[7] No valuation shown because of the nature of the enterprise.
[8] Public properties classified as municipal.
[9] Valuation of the state university campus not included.
[10] Valuation of capitol site not returned, the same having been a grant from the Nation.
[11] The valuations here reported for this state are those for 1912. By adding the payments for outlays in 1913, as shown in Table 10, the present valuations are more nearly obtained.

PART VII

COUNTY REVENUES, EXPENDITURES, AND PUBLIC PROPERTIES: 1913

PART VII.

COUNTY REVENUES, EXPENDITURES, AND PUBLIC PROPERTIES: 1913.

INTRODUCTION.

Scope of Part VII.—The tables contained in Part VII of this report set forth the total and per capita receipts and payments of counties during a fiscal period closing between July 1, 1912, and June 30, 1913, inclusive, and the value of their salable possessions at the close of such fiscal period.

ACCOUNTING TERMINOLOGY.

The necessity for a definite basis of classification.—By the requirements of law census statistics are based upon official records. Being derived in large part from the accounts and reports of accounting officers, such as comptrollers, treasurers, etc., the statistics of Part VII are, necessarily, classified exhibits of the financial transactions of the counties, or of what are called receipts and payments of cash. In the absence of uniformity in the use of financial terms in the reports of such officers, the Bureau of the Census has formulated a definite and a standard use of terms. The present significance of these terms, which has grown out of the early and tentative meaning assigned them, is based upon the usage of the best writers on commercial accounting, modified to meet the special requirements of governmental accounts.

As an aid to the intelligent use of the data contained in Part VII, there are herewith given brief definitions of such terms as were employed by the Bureau of the Census in the collection and compilation of the data.

Primary classification of receipts.—For the statistics herein presented the receipts recorded in local accounts and reports have been arranged in two primary classes, called revenue receipts and non-revenue receipts.

Revenue receipts.—The term "revenue receipts" is here applied to the moneys and other wealth received by governmental units for governmental purposes, which increase their aggregate assets without increasing their debt liabilities. In Part VII there have been tabulated as revenue receipts all amounts recorded in local revenue accounts, less amounts which have been returned or are to be returned by reason of error or otherwise. The tables of Part VII present the revenue receipts of counties, classified by source from which derived. So classified, revenue receipts fall into fourteen classes, each of which is specifically mentioned and described in the paragraphs which follow.

Taxes.—Taxes are enforced proportional contributions of wealth, levied and collected in the general interest of a community from individuals and corporations, by virtue of the sovereignty of the Nation or state, for the support of governments and for the defrayal of all expenses growing out of the public needs, which are levied without reference to the special benefits which the contributors may severally derive from the public purposes for which the taxes are required.

General property taxes.—A general property tax is a tax levied at the same rate upon the greater portion of the property within the territory subject to the taxing power. A similar tax levied upon a specified class of property within that territory is called a *special levy of the general property tax;* and if levied upon a specified portion of that territory, it is called a *local levy of the general property tax.* A general or a special levy which is applicable for a specified purpose is further designated as a *specific levy of the general property tax.*

Special property taxes.—"Special property taxes" is the designation here applied to those direct taxes levied upon property, which are assessed, levied, and

collected by methods not generally employed in the case of real property. As such taxes the Bureau of the Census includes all taxes upon the property of corporations levied upon the basis of the amount of corporate stock, corporate indebtedness, or of both corporate stock and indebtedness, or by any method other than upon the basis of the valuation of all property of the corporation; taxes upon savings banks and kindred corporations which are levied in proportion to a certain specified portion of deposits, as their excess above the value of specified investments; and taxes upon life insurance corporations assessed upon the basis of the valuations of their policies. Special property taxes also include all taxes levied upon mortgages at the time of their execution or entry of public record, and taxes on investments, choses in action, bonds and notes for specified periods of time, and all specific taxes upon property, taxes upon horses, mules, and other animals in specified amount per head, taxes upon grain in specified amount per bushel, or taxes upon ships in specified amount per ton of capacity.

Poll and occupation taxes.—As poll and occupation taxes, the Bureau of the Census includes all exactions by the government from private individuals which are levied without regard to the property or income of the taxpayer. These taxes comprise: (1) All so-called poll or capitation taxes, whether levied in special amounts upon all males of specified ages or levied as *quasi* property taxes based upon an arbitrary valuation of polls; (2) all so-called poll taxes graded in amounts according to occupations; and (3) all exactions of personal service, as work upon the highways or elsewhere, whether classed in local statutes as taxes or otherwise. Poll or personal taxes graded according to occupation may, with propriety, be called occupation poll taxes. These are to be distinguished from business taxes, since they are primarily levied upon persons and not upon the business or business activity by which the taxpayer secures an income.

Special assessments.—Special assessments are proportional contributions of wealth levied against land and collected from its owners and occupants to defray the costs of specified public improvements made, or of specified public services undertaken, in the interest of the general public. Special assessments, like taxes, are levied and collected under the sovereign powers of the state.

Business and income taxes.—These are taxes collected from persons, natural or corporate, by reason of their business or income, where such collection is not associated with the granting of a license or permit to carry on a particular business. Business taxes as here defined may be levied with or without reference to benefits conferred upon or enjoyed by the taxpayer. As such taxes the Bureau of the Census includes all taxes levied upon railroad, insurance, and express companies and all other corporations or individuals in proportion to their gross receipts. No receipts from income taxes were reported among county revenues.

Business license taxes.—Business license taxes are taxes exacted in connection with the issue of a written instrument called a license or permit, which authorizes the licensee to engage in some specified business or business activity. In this report business license taxes are tabulated under two headings—"Liquor licenses and other imposts" and "Other business licenses."

Nonbusiness license taxes.—Nonbusiness license taxes are taxes other than upon business that are exacted primarily for purposes of regulation, and are collected in connection with the issue of so-called licenses or permits, and are always levied with reference to measurable or assumed measurable benefits conferred upon or enjoyed by the taxpayers. The receipts from these taxes include license taxes paid by persons granted (1) dog licenses, (2) general licenses, and (3) permits.

In the first class, or that of *license taxes on dogs*, are included all taxes which are collected from the owners of dogs in connection with the issue of licenses or permits to keep such animals for a specified period of time, generally a year.

In the second class, or that of *general license taxes*, are included all nonbusiness license taxes that are collected in connection with the issuance of licenses or permits other than for keeping dogs, which are granted for a specified period of time, as a year, month, or day. Among taxes of this kind are those collected for vehicles, as automobiles, bicycles, etc., irrespective of whether these vehicles are kept for business or pleasure.

In the third class, or that of *permit taxes*, are included all nonbusiness taxes that are collected in connection with the granting of so-called licenses or permits which authorize specified acts or transactions, as marriage licenses or permits and departmental permits.

Fines, forfeits, and escheats.—The terms "fines," "forfeits," and "escheats" are defined as follows: Fines are amounts of wealth exacted from individuals, firms, and corporations, under the sovereign power of inflicting punishment for violation of law; forfeits are amounts accruing to governments in accordance with the terms of contracts as penalties for nonobservance of such contracts; and escheats are amounts of money received from the disposal of properties the owners of which can not be ascertained or located.

Highway privileges.—These receipts are amounts of money received by a civil division as compensation for special privileges in, upon, under, or over the public highways, granted to particular individuals and corporations beyond the privileges enjoyed by other individuals and corporations. Such receipts, however were reported for only a few of the counties.

Interest and rents.—Interest receipts represent all interest received by the general treasury and by the separate funds except (1) receipts of interest on taxes and special assessments, which are included with the receipts from original levies reported under those titles; and (2) accrued interest on original loans, which is included with nonrevenue receipts as from counterbalancing transactions. The receipts included under this heading as rents are those derived from rents of real property belonging to investment, sinking and public trust funds, and from other real property owned by the counties but not set apart for the use of any particular department.

Subventions and grants.—These receipts are gratuitous contributions made by one government to another, the term *subventions* being applied as the designation of such contributions as are received by a civil division with certain prescribed conditions, while the term *grants* is applied to those contributions which are made without the prior establishment of conditions.

Donations and gifts.—These receipts are gratuitous contributions made by private individuals and corporations to governments. The Bureau of the Census uses the term *donations* in referring to those contributions from private sources which are for the establishment or maintenance of almshouses, hospitals, infirmaries, libraries, and kindred institutions, and applies the designation *gifts* to all other contributions by private individuals and corporations to governments. *Pension assessments* are amounts of money collected from governmental employees toward the payment of pensions and the maintenance of pension funds in the interest of the classes of employees contributing.

Earnings of general departments.—These receipts include fees and charges received by governments for services performed by their general departments, rents of real property controlled by their departments, amounts received from sales of materials, and occasionally amounts from miscellaneous sources.

Earnings of public service enterprises.—These are the amounts received from the fees, charges, rates, tolls, and manufactures of those departments of government which are organized for the purpose of providing the public with some utility with the idea of receiving compensation therefor. In counties the most common public service enterprises are toll roads and ferries.

Nonrevenue receipts.—The term "nonrevenue receipts" is applied to all receipts of a civil division other than its revenue receipts as previously defined. The nonrevenue receipts of a fiscal year of any civil division comprise all receipts recorded during the year from (1) sales of investments and of supplies which have been purchased for sale; (2) issue of debt obligations and transactions which increase the indebtedness without the issue of formal debt obligations; (3) trust and agency transactions; (4) transactions offsetting outlay, as the collection of insurance to be applied to the reconstruction of destroyed property, refunds of erroneous payments, and receipts in error; and (5) such counterbalancing transactions as transfers between the funds or divisions of the governmental unit.

Primary classification of payments.—In the statistics of this bulletin the payments recorded in local accounts and reports are arranged in two primary classes, called governmental cost payments and nongovernmental cost payments.

Governmental cost payments.—The term "governmental cost payments" is applied to the payments by a civil division for its governmental costs, or for its expenses, interest, and outlays, less amounts which have been returned by reason of error or otherwise.

Classification of governmental costs.—The costs of government of a civil division for any fiscal year are the accrued costs, paid and payable, for the services employed, property constructed, purchased, or rented, public improvements constructed or otherwise acquired, materials utilized, and interest on borrowed moneys, which are incurred for administering the government, protecting person, property, and health, providing social necessities and conveniences, caring for the dependent and delinquent classes, bettering social conditions, performing other services, and carrying on other activities for which that civil division has authority. These costs are separable into three principal groups—payments for expenses, payments for interest, and payments for outlays.

Expenses.—In this class of governmental cost payments this bulletin includes all payments for expenses which are (1) the costs, other than interest, from which no permanent or subsequently convertible value is received, including the costs of services employed, property rented, and materials consumed in the maintenance and operation of the government, the conduct of governmental undertakings, and the management of trusts; and (2) losses resulting from defalcation, bank failures, and other causes. Payments for expenses are divided into two principal classes—payments for the expenses of general departments and payments for the expenses of public service enterprises. The first class of payments is subdivided into those for the expenses of the principal divisions of the general departmental service.

Interest.—Interest is the designation of the accrued costs, paid or payable, incurred for the use of credit capital.

Outlays.—The term "outlays" is here applied to payments for land and other property and public improvements, more or less permanent in character, which are constructed or acquired by civil divisions for use in the exercise of their governmental functions or in connection with the business undertaken by them. Payments for outlays offset by receipts have been deducted from the outlay payments and included among the payments for nongovernmental costs as payments in counterbalancing transactions.

Nongovernmental cost payments.—The term "nongovernmental cost payments" is here applied to all payments of civil divisions other than their payments for expenses, interest, and outlays. The payments are arranged in five classes which are the converse of the five classes of nonrevenue receipts of which mention has previously been made.

Public properties.—Public properties is the designation applied by the Bureau of the Census in referring to land owned and used by a civil division for governmental purposes, to buildings and other more or less permanent structures on such land (other than such permanent structures as have a value in community use but not in exchange, as highway paving, sewers, etc.), and to furniture, tools, apparatus, and other equipment having a life in service of more than a year.

Assets of funds.—A fund, as the term is employed in governmental accounting, is a sum of money, the principal or interest, or both principal and interest, of which is appropriated or devoted to a specific object. The *assets* of a fund are the cash and securities convertible into cash which are held by the fund for the accomplishment of its specified purpose.

DESCRIPTION OF GENERAL TABLES.

Number and character of general tables.—The statistics of Part VII of this report are presented in eleven tables, nine of which relate to county receipts and payments during the year 1913, while two set forth the value of county properties and of assets of county funds, other than sinking funds, at the close of that year. Tables 1, 3, 5, 7, 8, and 10 give the county figures in totals by states, while Tables 2, 4, 6, 9, and 11 give the data in detail by counties.

Tables 1 and 2.

Summaries of all receipts and payments.—Tables 1 and 2 present for the counties covered by Part VII of this report a summary, by states and by counties, of their receipts classified as revenue and nonrevenue and of their payments classified as governmental cost and nongovernmental cost. In the column of receipts headed "Revenue" are summarized all amounts that are recorded in the books of the counties as having been received on revenue account other than receipts in error and accrued interest received on the original issue of debt obligations. In the second column for receipts are summarized all other receipts under the heading "Nonrevenue." In the column of payments headed "Governmental cost" are summarized all amounts recorded in the books of the counties as having been paid on account of expenses, interest, and outlays, other than payments in error, payments of accrued interest on investments purchased, and payments for outlays balanced by amounts credited in outlay accounts. In the second column for payments are summarized all other payments under the heading "Nongovernmental cost." The receipts and payments summarized as here stated are given in detail in Tables 3, 5, and 8.

Tables 3 and 4.

Revenue receipts of counties.—In Tables 3 and 4 the revenue receipts, total and per capita, of counties are presented by states and by counties, under fifteen different headings, the first fourteen of which show the revenue receipts other than those from public service enterprises. The significance of each of these fourteen headings, which are employed as designations of the different classes of revenue, will be found on pages 55 to 57 of Part VII of this report. The last column of the tables shows the total of all revenues received by or for public service enterprises.

A number of the county reports received by the bureau were defective in their classification, revenues of one kind being included with those of another kind. Many of these defects have been remedied through correspondence with county officials, but it has not been possible to eliminate all of them. The principal defects of this character that could not be eliminated are pointed out in the paragraphs which follow, and should be taken into account when using county figures or the state totals affected thereby. These paragraphs also direct attention to a number of interesting features shown by the tables.

ALABAMA.

The amounts carried in the column headed "Special assessments and charges for outlays" represent contributions for roads and bridges. Such receipts were reported by 10 counties.

Of the 67 counties of Alabama, only 31 reported receipts from subventions and grants from the state, though it is probable that some of the remaining counties received money from the state for road purposes.

The amount reported for Dallas County in the column headed "Earnings of general departments and miscellaneous," $34,287, includes all the revenue receipts of the county other than from property taxes, no further segregation being possible from the reports received.

Except for $447 and $1,569, reported by Sumter and Washington Counties, respectively, as received from the tax on capital stock of corporations, all amounts appearing in the column headed "Special property taxes" represent the counties' share of the so-called mortgage tax. This tax partakes of the nature of a fee for recording the instrument, and it is possible that the amounts might be more properly entered in the column headed "Earnings of general departments and miscellaneous." No receipts of this

nature were reported for Barbour, Covington, Crenshaw, Dallas, Pike, or Russell Counties.

Only 29 of the 67 counties reported receipts from poll taxes. The law permits those subject to this tax to discharge such obligation by working on the public roads, and this probably accounts for the absence of receipts from this tax in the reports of a large number of counties.

Only seven counties show receipts from liquor licenses. These revenues were derived from the profits of the dispensaries located in those counties.

Twelve counties reported no receipts from nonbusiness license taxes, such as marriage licenses and automobile licenses. Such receipts are doubtless included among receipts from other sources of revenue.

Four counties show no receipts from fines, forfeits, and escheats. These counties probably had such receipts, but from the reports at hand it is not possible to show them separately.

ARIZONA.

The receipts reported for Coconino County, in the column headed "Public service enterprises," were derived from tolls collected on trails and a ferry.

ARKANSAS.

The general property tax is by far the most important source of revenue of Arkansas counties. The per capita receipts from general property taxes were especially high for Arkansas, Cross, Poinsett, Pulaski, and Sebastian Counties. The taxes of independent school districts are not herein included.

The amounts shown in the column headed "Special assessments and charges for outlays" represent contributions for roads and fences.

The amounts given in the column headed "Subventions and grants" represent the counties' receipts from sale of state lands and from forest reserve income. No subventions on behalf of schools are shown, for the reason that the schools in Arkansas are independent of the county organizations.

CALIFORNIA.

The receipts per capita from general property taxes varied from $9.30 in Alameda County to $33.25 in Colusa County, the average being $15.64.

The amounts carried in the column headed "Special assessments and charges for outlays" represent contributions for roads and bridges.

Twenty-four counties did not report receipts from poll taxes. Such taxes are levied at the discretion of the county.

Thirteen counties in the state did not report the amounts received from licenses issued to brokers, auctioneers, theaters, circuses, peddlers, etc., which for other counties are shown in the table under the caption "Other business licenses." If these counties derived a revenue from such sources the receipts were included with the earnings of general departments.

Fifteen of the counties did not report separately the receipts from "nonbusiness licenses." The greater portion of such receipts came from the issuance of marriage licenses. In some of the counties of the state such receipts were reported in connection with fees and no segregation could be made. In such cases these receipts have been tabulated in the column headed "Earnings of general departments and miscellaneous." Alpine County was the only county reporting no receipts from fines, forfeits, and escheats.

Thirty-one counties reported receipts from highway privileges. These receipts were derived from franchises of interurban railways and telephone companies.

All counties reported receipts from subventions and grants. Such receipts included state aid for schools and reimbursement to counties for loss of revenues from ad valorem and railroad taxes. The amounts carried in the column headed "Donations and gifts" represent contributions to schools.

Lassen County was the only county in the state reporting earnings of public service enterprises. The amount received, $357, represents the receipts on account of the county cemetery.

COLORADO.

Receipts from poll taxes were reported by 31 of the 62 counties of the state. These are revenues of the road districts rather than of the counties, but the receipts from poll taxes and expenditures for road improvements by the road districts were included in the county treasurer's reports and could not be separated from the county transactions.

Only a few of the counties reported receipts from other business licenses. The small amount shown consisted principally of license fees from transient dealers, peddlers, etc. If the counties not reporting such receipts derived revenue from this source, the receipts were doubtless included with earnings of general departments and miscellaneous.

A few of the counties did not show any revenue from nonbusiness license taxes, which consist principally of receipts from the issue of marriage licenses, and in these cases receipts from this source are doubtless included in the column headed "Earnings of general departments and miscellaneous."

The fines collected in the counties were apportioned to the independent school districts and for that reason are not shown as county revenue.

The amounts carried in the column headed "Subventions and grants" represent receipts from the forest reserves. No subventions for schools are included in the county revenues for the reason that the schools in Colorado are independently administered.

CONNECTICUT.

New London and Windham Counties reported no receipts from general property taxes.

The amounts carried in the column headed "Liquor licenses and other imposts" represent 10 per cent of the collections of town liquor licenses which is retained by the counties.

The amounts shown in the column headed "Subventions and grants" do not include any receipts from the state for educational objects, since the schools of Connecticut are not under county control.

The amounts reported in the column headed "Earnings of general departments" consist principally of receipts for the board of prisoners, from earnings of prisoners, and from the sale of products of farms connected with institutions.

DELAWARE.

The receipts shown for New Castle County under the heading "Nonbusiness license taxes" were from dog licenses; those under "Highway privileges" were from public service corporations for privileges on roads and bridges; and those under "Subventions and grants" were from the state, for highways.

FLORIDA.

The counties of this state apparently depend upon the general property tax for revenue. For five counties, Brevard, Dade, Osceola, Palm Beach, and St. Lucie, the per capita receipts from this tax were in excess of $10. It will be seen from Table 6 that the governmental cost payments for expenses and outlays are correspondingly high in the counties mentioned.

The receipts classified as from special property taxes were derived from the state tax on the mileage of telegraph and railroad companies, of which each county containing such property receives its share.

All counties reported receipts from poll taxes. The receipts classified as from nonbusiness license taxes were derived from hunting and automobile licenses. The receipts classified as from subventions and grants represent the state's apportionment of moneys for county schools and highways. The amounts carried in the column "Donations and gifts" represent in almost every instance contributions for schools.

The amounts shown for Putnam and Saint Lucie Counties in the column headed "Public service enterprises" represent receipts from a toll bridge and a ferry, respectively.

GEORGIA.

Receipts from poll taxes are not shown for all counties. Where shown, the amounts represent the commutation of work upon the highways, enjoined upon all able-bodied males between the ages of 21 and 50 years.

Only 13 counties in the state reported receipts from the issue of licenses to conduct shows, peddle, and engage in certain professions. If other counties derived revenue from this source the receipts are doubtless included with earnings of general departments.

Nonbusiness license taxes consisting of receipts from the issue of marriage licenses were reported separately by 23 counties. In other counties such receipts were undoubtedly recorded as fees and included with earnings of general departments.

Receipts from fines, forfeits, and escheats were reported by 62 counties. Fines and forfeits were classified as miscellaneous departmental receipts in the reports of some of the counties, and where no segregation could be made they are included in the column headed "Earnings of general departments and miscellaneous."

Floyd County alone reported receipts from highway privileges. The $600 shown represents the amount collected from an electric railway company for the use of a county bridge.

In several counties the school districts were independent and their receipts from subventions have been tabulated as receipts for other civil divisions in Table 9. Where the schools were under county administration and it was possible to show them separately, receipts of this character appear in the column headed "Subventions and grants." Also classified as subventions are the receipts from the state for pensions.

IDAHO.

The receipts shown in the column headed "Special assessments and charges for outlays" represent donations for road work and for the construction of bridges.

"Other business licenses" in Fremont County are probably included in the column "Earnings of general departments and miscellaneous."

"Nonbusiness license taxes" in the counties of this state consist principally of marriage licenses. For those counties showing no receipts from this source the items were not reported separately, and it is probable that they are included with the amounts shown in the column headed "Earnings of general departments and miscellaneous," which includes the fees of county officers.

The amounts carried in the column headed "Subventions and grants" represent, in almost every instance, receipts from forest reserves. These amounts are not, however, the total receipts from this source, since that portion of them devoted to the support of schools, which are independent in this state, is included with other school revenues in Table 9 in the column headed "From trust and agency transactions."

ILLINOIS.

In the following counties the taxes levied by the townships for road purposes and collected by the counties are included with the general property taxes of the counties: Bond, Christian, Dewitt, Fayette,

Logan, McLean, Macon, Montgomery, Moultrie, Piatt, and Shelby. The per capita receipts from general property taxes for these counties are, therefore, high.

In this state the counties derive no revenues from poll, inheritance, or corporation taxes.

Of the 102 counties in the state, 12 reported receipts from liquor licenses. These revenues came from the few dramshops situated over 2 miles from the nearest village or city.

Only 56 counties reported receipts from nonbusiness license taxes. This class of revenues includes marriage licenses, hunters' licenses, and dog licenses. Those counties not reporting such items separately probably included them with the earnings of general departments, and a segregation is impossible.

No receipts from fines are shown, as all fines (except in cities and towns for violation of city and town ordinances) are collected by the state's attorney and paid directly to the county superintendent of schools for distribution to the school districts.

INDIANA.

Many counties did not levy a poll tax in 1912. In the county reports the poll taxes collected are included with the general property taxes, but when possible a segregation has been obtained from the county auditors. There were a few cases in which no segregation could be made, and in these counties a percentage of the levy, based on the average receipts where levy and collections were known, was taken.

The amounts shown in the column headed "Special assessments and charges for outlays" are receipts for the construction, repair, and cleaning of county ditches.

No receipts are shown in the columns headed "Other business licenses" and "Nonbusiness license taxes," as in the county reports all receipts from these sources are included with fees received by the county clerk and in the table are included with other items in the column headed "Earnings of general departments and miscellaneous."

All counties except nine reported receipts from fines, forfeits, and escheats. Fines and forfeits go to the credit of the common school fund.

IOWA.

Franklin and Palo Alto Counties reported no receipts from poll taxes. Doubtless the amounts of such taxes are included with general property taxes.

A number of counties reported special assessments. These were the drainage taxes collected in the several drainage districts. The amounts shown in the column headed "Liquor licenses and other imposts" were received under the "mulct tax" law, by the terms of which $600 is collected annually from all dealers in intoxicating liquors.

The amounts given in the column headed "Nonbusiness license taxes" represent the animal or dog tax collected uniformly by the counties of the state.

The receipts from fines, forfeits, and escheats reported by the counties of this state were very small.

The amounts included in the column "Subventions and grants" were received by the counties from the state as the apportionment of the automobile tax and as aid for farmers' institutes.

Fleming County reported receipts from a toll bridge conducted as a public service enterprise.

KANSAS.

Several counties having a small population, notably those in the semiarid section in the southwestern part of the state, show large per capita receipts from general property taxes. As certain expenses necessary for carrying on the county organization must be met whether the county be large or small, the per capita receipts and expenditures must necessarily be greater in the sparsely populated counties.

Six counties reported receipts from special assessments. All of these were levied, or donated, for improvements of certain roads. Receipts from other business licenses were reported by 60 of the 105 counties in the state. This revenue, amounting to $9,036, was practically all derived from license fees from itinerant vendors.

Several counties did not report separately the receipts from nonbusiness licenses which in this state consisted principally of receipts from the issue of marriage licenses, hunters' licenses, and automobile and motorcycle licenses. In those counties showing no receipts from these sources, these items were probably included with earnings of general departments.

Two counties, Labette and Wyandotte, reported receipts from highway privileges. The amount shown for Labette County, $6,635, represents the receipts from a traction company's right of way, and the $4,724 reported by Wyandotte County was from bridge rentals.

The amounts carried in the column headed "Subventions and grants" represent, in nearly every instance, the state's aid to county teachers' institutes.

The receipts from public service enterprises shown for the three counties of Logan, Norton, and Sherman were from seed grain sold to the farmers.

KENTUCKY.

There were no county collections of special property or business taxes, and no receipts from business and nonbusiness license fees, fines, forfeits, and escheats, or highway privileges.

Boyd, Campbell, Greenup, Jackson, Jefferson, Kenton, and Muhlenberg Counties reported no receipts from poll taxes. These counties may have commuted

the poll tax to labor on the highways, and it is probable that no estimates of such receipts were obtainable. The per capita receipts of this tax shown for Butler County are comparatively high.

The amounts carried in the column "Special assessments and charges for outlays" represent contributions for roads and drainage assessments.

Next to receipts from general property taxes, the receipts from subventions were important. By far the greatest portion of these came from the state as school apportionments. Other amounts included were receipts from the state for jury expenses and sheep claim settlements.

In the column headed "Donations and gifts" have been included the amounts of private subscriptions to schools, etc.

LOUISIANA.

The general property taxes collected by the parishes in Louisiana included the taxes for school purposes, the schools being under the control of the parish governments. The high per capita receipts shown for St. Bernard and Vernon Parishes were due, in part, to special levies for road improvements.

Several parishes did not report separately receipts from nonbusiness license taxes, which consisted principally of receipts from the issue of marriage and vehicle licenses. For Lafourche and St. Mary Parishes receipts from these sources were included with the amount shown under liquor licenses. For other parishes such revenue was doubtless included with other items in the column headed "Earnings of general departments and miscellaneous."

Subventions for school purposes were not reported for the parishes of Allen, Beauregard, and Jefferson Davis. These parishes were recently formed from part of Calcasieu Parish, and the school data for the year reported could not be segregated. For three parishes no amounts are shown in the column headed "Earnings of general departments and miscellaneous." Six parishes reported receipts from public service enterprises. These enterprises were ferries and toll bridges.

MAINE.

The counties of this state derived their revenue from the following four sources: General property taxes; fines, forfeits, and escheats; interest and rents; and earnings of general departments. The uniformity in the per capita receipts of the several counties will be noted.

MARYLAND.

The counties of this state depended for revenue chiefly upon the general property tax and subventions from the state. The amounts shown as received from other sources are negligible in quantity and vary greatly in the several counties.

The amounts shown in the column headed "Special property taxes" represent the tax on mortgages collected in six counties.

Four counties, Carroll, Harford, Howard, and Montgomery, reported cash contributions for roads, etc. These amounts have been tabulated in the column headed "Special assessments and charges for outlays."

Receipts from donations and gifts were reported by three counties, Baltimore, Carroll, and Kent. These amounts represent contributions for schools.

Two counties, Kent and Talbot, reported receipts from wharves operated as public service enterprises.

MASSACHUSETTS.

Essex and Norfolk Counties reported receipts from street railway companies for use of highways. Such receipts are tabulated in the column "Highway privileges."

For Norfolk and Plymouth Counties amounts are shown in the column headed "Donations and gifts." These amounts represent pension assessments in one county and contributions toward the building of a sea wall in the other.

MICHIGAN.

The per capita receipts from general property taxes for Alger, Ontonagan, and Oscoda Counties are $8.67, $9.63, and $8.45, respectively, as against a state average of $2.06.

Calhoun and Oscoda Counties reported no receipts from special property taxes. If these counties received revenue from mortgage or vessel tonnage taxes, their records did not show the amounts separately.

The receipts classified as special assessments were contributions from interested parties for highway improvement and assessments levied against property for the construction of drainage ditches.

The receipts from the issue of hunters' licenses are shown in the column "Nonbusiness license taxes." Such receipts were reported by 24 counties.

The column "Subventions and grants" includes the amounts received from the state as aid in highway improvement.

MINNESOTA.

The high per capita receipts from general property taxes shown for Cook County were doubtless due largely to the fact that the county was sparsely populated.

The greater portion of the amounts tabulated in the column headed "Special property taxes" represents receipts from the mortgage registry tax. The counties of this state share in the inheritance tax.

The amounts included in the column headed "Special assessments and charges for outlays" are composed chiefly of assessments levied upon owners of property benefited by county ditches.

Of the 86 counties in the state, only 30 reported receipts from nonbusiness license taxes, which consisted principally of receipts from the issue of marriage

licenses. It is probable that for the majority of the counties the revenue derived from this source is included with earnings of general departments.

Houston County was the only county in the state to report no receipts from fines, forfeits, and escheats. The amounts carried in the column headed "Subventions and grants" represent state aid for roads and bridges.

MISSISSIPPI.

All counties reported receipts from poll taxes, fines, forfeits, and escheats, subventions and grants, and departmental earnings.

Of the 79 counties, only 15 failed to report receipts from nonbusiness licenses, and only 4 reported no receipts from interest and rents.

For 13 counties amounts are shown in the column headed "Special assessments and charges for outlays." For 10 of these counties the amounts represent collections of betterment taxes, locally known as drainage taxes. In the case of Leake, Quitman, and Sharkey Counties the amounts included in the column mentioned represent contributions for road improvements by persons benefited.

MISSOURI.

Sixty-five of the 114 counties of the state reported receipts from poll taxes. It is probable that no segregation of such taxes was made in the reports of the remaining counties and that the receipts from poll taxes for these counties are included in the column headed "General property taxes."

The amounts carried in the column headed "Special assessments and charges for outlays" represent, in the majority of instances, contributions for road improvements.

Nearly all counties reported receipts from "Other business licenses," such as those levied upon itinerant vendors, shows, etc.

The receipts classified as "Nonbusiness license taxes" were derived from the issue of marriage and dog licenses. Other counties doubtless received revenue from these sources, but their reports did not show the amounts separately.

Thirteen counties reported no receipts from fines, forfeits, and escheats. St. Louis County was the only county to report receipts from highway privileges.

The amounts included in the column headed "Subventions and grants" were receipts from the state for aid toward the improvement of highways and toward the salary of the county school superintendent.

Worth County alone reported receipts from donations and gifts. This amount was donated by a commercial club for a courthouse clock.

MONTANA.

Fourteen of the 31 counties in the state reported receipts from special property taxes. The amounts shown represent 40 per cent of the state inheritance tax collected in each county.

Five counties reported contributions from private sources for road and bridge improvement. Such receipts are tabulated in the column headed "Special assessments and charges for outlays."

All but seven counties reported receipts from subventions, which were apportionments of forest reserve funds from the state for road improvements.

Donations were reported as received by Lincoln County for the county fair fund and by Silver Bow County from the Centerville Fire District, the object of the latter not being specified.

The earnings of public service enterprises reported by Cascade and Sweet Grass Counties represent receipts from the operation of ferries.

NEBRASKA.

The receipts from special property taxes reported by 38 counties were state inheritance taxes paid to the county treasurers and expended under the direction of the county board for each county for permanent road improvements. It is probable that the counties which did not report any revenue from this source included such receipts with those from general property taxes.

A number of counties reported no receipts from poll taxes. It is probable that in these counties such a tax was commuted to work on highways and no record made of the amounts.

Three counties, Garden, Hooker, and Thomas, reported no receipts from nonbusiness license taxes, which consist principally of receipts from the issue of marriage, motor vehicle, and hunters' licenses. Receipts from those sources in the counties mentioned were doubtless included with earnings of general departments.

Several counties did not report receipts from fines, forfeits, and escheats, and receipts from those sources were doubtless included with other items shown in the column headed "Earnings of general departments and miscellaneous."

NEVADA.

Receipts from nonbusiness license taxes, consisting chiefly of receipts from the issue of marriage, hunters', and dog licenses, were not reported by Churchill County, and it is probable that such receipts in this county were included with general departmental earnings.

The $6,225 reported as earnings of public service enterprises consisted of revenues derived from a water-supply system maintained by Churchill County and a public telephone system in Lincoln County.

Humboldt, Storey, and Washoe Counties reported receipts from highway privileges, such as franchise rights of gas, electric, street railway, and telegraph and telephone companies.

Eureka and Humboldt Counties reported receipts from private persons for schools and hospitals. The amounts of such receipts are tabulated in the column headed "Donations and gifts."

NEW HAMPSHIRE.

No receipts from poll taxes are shown, as they form an integral part of the general property tax and can not be segregated.

The amount received from interest and rents in Hillsborough County was derived principally from interest on the assets of the sinking fund.

The sale of county farm produce is the most important of the items constituting the amounts carried in the column headed "Earnings of general departments and miscellaneous."

NEW JERSEY.

Tabulated as special property taxes are the receipts by 10 counties of their proportion of the inheritance tax collected by the state. The amounts shown in the column headed "Special assessments and charges for outlays" represent special charges for road construction. The amounts carried in the column headed "Nonbusiness license taxes" represent receipts from burial and street and sewer permits.

Eight of the 21 counties of the state reported receipts from highway privileges. The amounts so classified were collected from railway, gas, electric, and other public service corporations for privileges in county highways.

Sixteen of the 21 counties reported receipts from interest and rents, the amounts for Essex, Hudson, Mercer, and Union Counties being much in excess of those for the other counties.

Only one county, Sussex, failed to report receipts from subventions and grants. All other counties received aid from the state for highway construction and maintenance, and several counties received subventions for the care of the insane.

NEW MEXICO.

Of the amounts given in the column headed "Special property taxes," the entire amount for Eddy County and $2,560 of that for Chaves County represent assessments on owners of artesian wells for the salary of well examiner, etc. The remaining amounts given in this column are collections of taxes on car and express companies. The portion of such collections that was paid by car companies is properly classified as from special property taxes, but the portion paid by express companies upon their gross earnings would properly appear in the column headed "Business taxes."

For nine counties no receipts from poll taxes are shown. Such taxes are collected by every county, unless commuted to road labor, and have undoubtedly been included in receipts from some other source. Of the 26 counties of the state, San Juan County alone reported no receipts from liquor licenses. Any receipts of the counties from marriage licenses are doubtless included in the column headed "Earnings of general departments" since no distribution of the item of "clerk's fees" found in the county reports was attempted.

NEW YORK.

Receipts from special assessments and charges for outlays were reported by Westchester County only. This amount, $1,367,394, represents assessments levied against the taxable property within the territory covered by the Bronx Valley sewerage district for the retirement of bonds issued for the purpose of constructing the sewerage system. It is possible that this amount should have been reported as received from general property taxes.

Many of the counties do not show receipts from fines, forfeits, and escheats. In such cases revenues from those sources are doubtless included with departmental earnings.

The $2,999 shown as nonbusiness license taxes represents the amount of dog taxes collected by the two counties of Greene and Ulster.

Genesee, Hamilton, and Tioga Counties reported no subventions from the state for highways. If such subventions were received by these counties, they were not shown separately in the county records.

The $10,126 shown under the caption "Donations and gifts" represents donations to a poor fund reported from Oneida County, gifts for tuberculosis hospitals in Ontario and Tompkins Counties, and teachers' pension assessments in Saratoga and Nassau Counties.

NORTH CAROLINA.

Receipts from poll taxes were not reported separately from Macon County. The revenues derived from this source were doubtless included with the amount shown for general property taxes.

Sixteen counties did not report receipts from other business licenses. It is probable that these counties derived revenue from this source and that such receipts have been included with amounts shown under other captions.

Receipts from nonbusiness licenses, consisting principally of receipts from the issue of marriage licenses and automobile licenses, were not reported by Clay County. Probably receipts from such sources were included elsewhere and for lack of data could not be segregated.

The counties of Caldwell, Clay, Gaston, Gates, and Lincoln did not report separately receipts from subventions and grants. Doubtless subventions were received by these counties, but owing to differences in classification and lack of proper data a segregation could not be made.

NORTH DAKOTA.

Ten counties reported receipts from special assessments which were levied against certain property benefited by the construction of county drains.

Twenty-three of the 49 counties of the state reported receipts from business licenses. The remaining counties probably included revenues from this source with other items shown under the caption "Earnings of general departments and miscellaneous."

Several counties did not report separately receipts from nonbusiness license taxes, which in this state consist principally of automobile licenses. It is probable that in some cases such receipts were included with departmental earnings or property taxes.

Donations and gifts were reported as received by three counties. The $22,000 reported by Benson County and the $1,600 by Walsh County represent subscriptions and donations by the citizens for schools, and the $275 reported by Dickey County consisted of private contributions for the purpose of beautifying the courthouse grounds.

OHIO.

The data relating to receipts for all counties in Ohio except Cuyahoga and Hamilton were secured from public records at the state capitol in Columbus. The reports for Cuyahoga and Hamilton Counties were obtained from county records.

The amounts shown in the column headed "Special property taxes" represent the counties' share of the inheritance tax collected. The counties retain 25 per cent and transmit the balance to the state.

Cuyahoga County was the only county which reported receipts from highway privileges. The $1,000 shown in the table was paid by a railway company for the use of a county bridge.

The $55,141 shown in the column headed "Donations and gifts" for Hamilton County represents gifts for a public library.

Receipts from a memorial hall were reported by Hamilton County. The amount of such receipts appears in the column headed "Public service enterprises."

OKLAHOMA.

Eight of the 77 counties of the state reported receipts from special assessments and charges for outlays which were principally charges for paving streets of subdivisions outside of city limits, donations to road funds, and ditch and drainage taxes levied against property benefited.

Fifteen counties failed to report separately receipts from the issue of business licenses. If these counties derived revenues from this source the receipts were probably included with earnings of departments.

Receipts from nonbusiness license taxes, principally receipts from hunters' and marriage licenses, were not reported separately by 32 counties, but are doubtless included with other items shown in the column headed "Earnings of general departments and miscellaneous."

The six counties which failed to report separately receipts from fines, forfeits, and escheats, probably included such receipts with earnings of general departments.

The receipts from highway privileges reported by Tulsa County were receipts from a telephone company for the use of a county bridge.

OREGON.

Nine of the counties in the state reported receipts from special assessments which are principally contributions and subscriptions for the construction of bridges and improvement of roads.

Twenty-four counties failed to report separately receipts from other business licenses, and three counties showed no receipts from nonbusiness license taxes. If these counties derived revenues from such sources, the receipts are probably included with other items shown under the caption "Earnings of general departments and miscellaneous."

Receipts from fines, forfeits, and escheats were not separately reported by Grant County. If the county received revenues from these sources they were probably classified as earnings of general departments.

The receipts from highway privileges reported from Multnomah County were for the use of certain bridges by street railway companies and rent for buildings.

Twenty-five counties reported receipts of subventions from the state. For the most part such receipts were derived from forest reserves and sale of certain lands.

The amount shown for Josephine County as earnings of public service enterprises represents the earnings of a county cemetery.

PENNSYLVANIA.

Receipts from nonbusiness license taxes were not reported separately by two counties but were probably included with general property taxes.

Six counties did not report separately receipts from fines, forfeits, and escheats, but probably receipts from these sources are included with the items shown in the column headed "Earnings of general departments and miscellaneous."

Among the items composing the amounts tabulated in the column headed "Subventions and grants" are the receipts of state taxes returned to the counties for their own use in defraying the expenses of assessment and collection.

Two counties in the state reported earnings from public service enterprises, consisting of receipts from a soldiers' memorial hall in Allegheny County, and receipts from toll bridges in Luzerne County.

RHODE ISLAND.

The counties in this state merely indicate the boundaries of judicial districts and transact no financial business. For this state, therefore, there were no county revenues or expenditures.

SOUTH CAROLINA.

The receipts classified as from business taxes are the counties' share of the graduated license fees collected by the state from foreign insurance companies. These fees are paid semiannually and are equal to 2 per cent on the total premiums less any dividend credits. It is probable that all counties should show receipts from nonbusiness license taxes, which include marriage licenses. In most counties, however, these appear to have been included with receipts from other sources of revenue or retained as fees by the officials issuing such licenses.

The receipts from public service enterprises reported for nine counties are the receipts of those counties from their share of the net profits of the liquor dispensaries operated within them. A complete statement of the transactions of the dispensaries would have made it possible to show the total receipts of these dispensaries in Tables 3 and 4, and the total expenses of operating them in Tables 5 and 6, but such complete data were not secured.

SOUTH DAKOTA.

The amounts tabulated as "Special assessments and charges for outlays" represent assessments for ditch construction.

The amounts carried in the column "Earnings of public service enterprises" are the receipts from the sale of seed and grain to farmers.

TENNESSEE.

The amount shown for Davidson County in the column headed "Special assessments and charges for outlays" consists of contributions by interested parties for road improvement.

Four of the 96 counties reported no receipts from business licenses other than liquor; and four counties, reported no receipts from departmental earnings.

All counties reported receipts from subventions. These amounts were apportionments to the counties from the state for education.

The receipts classified as from donations and gifts were contributions for schools and school libraries.

TEXAS.

Eight counties, Crockett, Jackson, Jeff Davis, King, Oldham, Pecos, Reagan, and Roberts, reported per capita receipts from general property taxes in excess of $10, the average for the state being $2.65. The high per capita receipts of Oldham and Pecos Counties are due to the fact that the taxes of two years were collected at the same time and credited to the revenue of one year. In the case of the remaining counties, the tax valuations were high and the population small.

A county poll tax not to exceed 25 cents for each male between the ages of 21 and 60 years is allowed by law. For 18 counties no receipts of this nature were reported.

The amounts shown for 15 counties in the column headed "Special assessments and charges for outlays" represent contributions from interested parties for road repair and construction.

The amounts included in the column headed "Nonbusiness license taxes" consist of marriage license fees. Every county in the state probably derived revenue from this source, but for those counties in which the fees went directly to an official and were not a matter of record, it was impossible to show the amount of such receipts.

No receipts from fines, forfeits, and escheats were reported for Duval, Loving, Oldham, Willacy, and Zapata Counties. Two counties, Dallas and Tarrant, reported receipts from highway privileges for the use of a viaduct and a bridge, respectively.

UTAH.

Receipts from business licenses were not reported separately by seven counties. If these counties derived revenue from such sources the receipts were probably included with other items shown in the column headed "Earnings of general departments and miscellaneous."

San Juan County did not report separately receipts from fines, but probably included revenues from such sources with earnings of general departments.

The amounts shown as receipts from highway privileges represent receipts from street railway companies for the use of streets in Salt Lake County and for the use of a bridge in Washington County.

The receipts classified as from subventions consisted of state aid for highways and schools and receipts of the forest reserve fund.

Two counties reported earnings of public service enterprises. These enterprises were a water-supply system operated by Salt Lake County and a ferry operated by Grand County.

VERMONT.

Receipts from general property taxes were not reported by Grand Isle County. The state paid the salaries of county officials and the greater part of other county expenses. The small payments made by the county were made from revenues derived from investment properties and subventions.

VIRGINIA.

Ten of the 100 counties of the state did not report separately receipts from poll taxes, but it is probable that in some instances these were included with general property taxes.

Eighteen counties reported receipts from special assessments, which were principally donations for road improvements.

Several counties did not show receipts from nonbusiness license taxes, which were taxes on dogs. If these counties derived revenue from this source, the receipts were probably included with general property taxes.

Fifty-three counties reported receipts of subventions from the state for highways.

Of the large amount shown for Norfolk County as receipts from interest and rents, $67,600 was the county's share of the income from the lease of a ferry owned jointly by the county of Norfolk and the city of Portsmouth.

Only two counties, Elizabeth City and Gloucester, reported receipts from public service enterprises. These receipts were from wharves.

WASHINGTON.

The receipts from special assessments reported by 16 counties were principally receipts from donations for bridges and roads.

Fourteen of the 39 counties in Washington did not report separately receipts from other business licenses. It is probable that receipts from this source in some instances were included as earnings of departments.

Receipts from the sale of forest reserve timber constitute the greater portion of the amounts tabulated in the column headed "Subventions." Such receipts were reported by 23 counties.

The earnings of public service enterprises shown for King County were the receipts from ferry and wharf properties operated by the county.

WEST VIRGINIA.

It is probable that dog taxes were collected by all counties, though for a number of counties no amounts are shown in the column headed "Nonbusiness license taxes," the column in which all dog licenses should be included. For such counties these license receipts are doubtless included with those from general property taxes.

It is probable that most of the counties for which no receipts from fines are shown received revenue from this source but reported them in connection with receipts from other sources.

The receipts shown for Marshall and Ohio Counties in the column headed "Highway privileges" represent amounts received by those counties from electric railway companies for right of way in county roads.

WISCONSIN.

The receipts shown from special property taxes represent the counties' share of the inheritance taxes collected. It may be that in some counties receipts from this source were included with those from general property taxes.

Seven counties reported receipts from special assessments. These were principally contributions for bridges and roads.

Only 19 counties reported receipts from business taxes. The receipts so classified were the counties' share of the graduated income tax collected from individuals, firms, copartnerships, corporations, etc., doing business within the state. The income-tax law has recently gone into effect in Wisconsin and the first apportionment of revenues derived from this source was made in 1913. The data secured from several of the counties were for a fiscal year closing prior to the date of this apportionment.

Receipts from nonbusiness license taxes and from fines, forfeits, and escheats were not reported separately by several counties, but doubtless in many instances were included with other items shown in the column headed "Earnings of general departments and miscellaneous."

The receipts classified as subventions are chiefly those derived from the state for county highways and asylums.

WYOMING.

The amounts tabulated in the column headed "Special property taxes" represent the collections of the inheritance tax.

The amounts shown as receipts from poll taxes represent receipts from poll taxes for road purposes only, which are levied at the discretion of the county commissioners. Receipts from poll taxes for schools were agency transactions and included in the amount shown as "Trust and agency transactions" in Table 9.

Receipts from business taxes were not reported separately by four counties. These taxes were collected from express companies and apportioned one-half to the state and one-half to the counties. The counties not showing such receipts may have included them with general property taxes in their reports.

Only 6 of the 14 counties in the state reported receipts from other business licenses, but revenue derived from these sources may have been included in the records of the other counties with general property taxes or earnings of general departments.

The report secured from Sweetwater County did not show separately receipts from nonbusiness license taxes, which were receipts from the issue of marriage licenses, but it is probable that these were included with other items shown in the column headed "Earnings of general departments and miscellaneous."

The receipts classified as subventions are the amounts of forest reserve revenue given by the state to the counties for highway improvement.

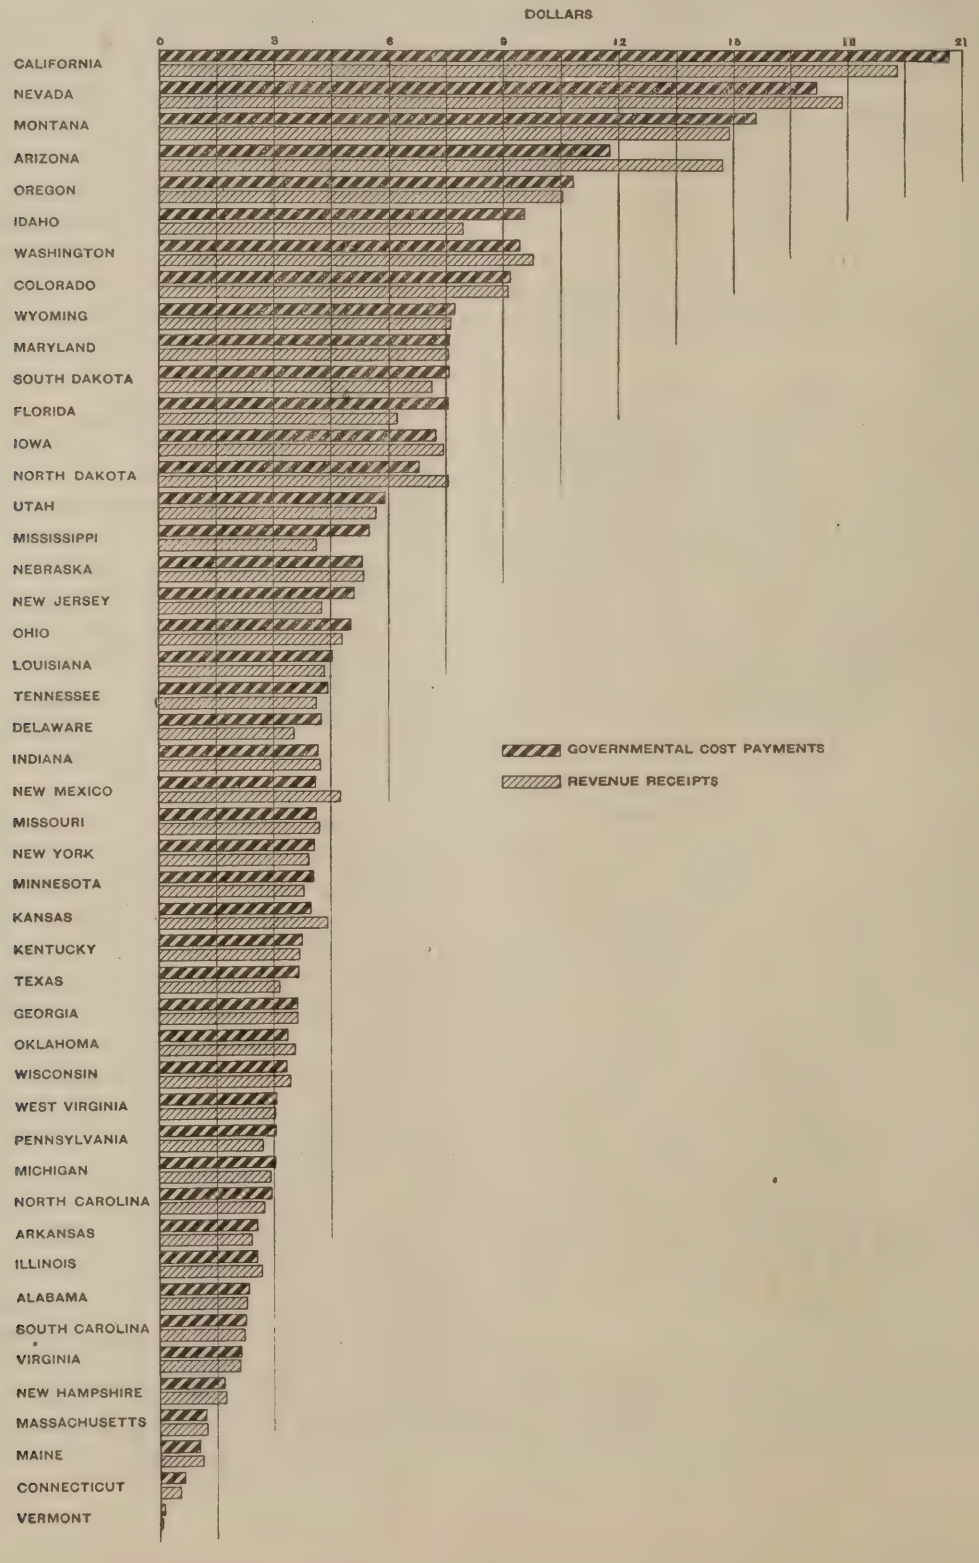
The donations shown as received from Converse County were for a county library.

Tables 5 and 6.

Governmental cost payments of counties.—In Tables 5 and 6 are presented, by states and by counties, the governmental cost payments, total and per capita, of counties. These payments are classified primarily as expenses, interest, and outlays. The significance of each of these terms, as employed by the Bureau of the Census, will be found on page 57 of Part VII of this report. Expenses are further classified under ten different headings, nine of which represent the general departments of county government, the remaining column presenting the expenses of public service enterprises under county management. The payments for expenses of highways and schools do not include those made by independent road and school districts, the payments shown on these tables being only such as were made from county revenues.

The diagram which follows presents graphically the relation between the per capita of governmental cost payments and that of revenue receipts.

PER CAPITA GOVERNMENTAL COST PAYMENTS AND REVENUE RECEIPTS OF COUNTIES: 1913.



Certain defects of classification in the reports received by the bureau should be taken into account when using the county figures or the state totals affected thereby. These defects arise from lack of sufficient segregation, with the result that expenditures for certain objects are included with those for other objects. The principal of these defects, together with exceptional and interesting features, are pointed out in the paragraphs which follow:

ALABAMA.

The reports received from a number of counties were not in sufficient detail to enable the bureau to present a complete classification of expenditures, payments shown in the columns headed "General government" and "Miscellaneous and general" evidently including certain amounts that should appear in other columns.

Ten counties show no expense for "Protection to person and property," though all of them must have had expenses for jails and for registers of deeds, which should have been shown under that heading. From Table 11 of valuations it appears that all counties have jails. Five counties show no expense for "Conservation of health and sanitation," though all of them doubtless had health officers and made disbursements for their salaries and miscellaneous expenses. Eight counties show no expense for "Schools," though all of them probably had county superintendents of schools and disbursed moneys for the support of this office. The school finances in Alabama are not under county control and the amounts of payments for schools as here given represent only a small part of the expenditures on account of schools in the respective counties

The counties of Dale, Dekalb, Franklin, Lawrence, and Lowndes reported no payments for interest, although they reported indebtedness at the close of the year. Correspondence has failed to secure an explanation of this apparent lack of harmony in their reports. It is possible that the debt reported as out standing at the close of the year was contracted during the year and that no interest had become due.

ARIZONA.

The amounts carried in the column headed "Schools" do not represent the total expenditures for school purposes within the several counties, but only the county apportionments for educational purposes.

ARKANSAS.

The payments for schools given in this table do not represent the total expenditures on account of the schools in the counties, but only the payments by the counties to the independent school districts. For the most part these payments were the apportionment of county poll taxes.

Four counties, Arkansas, Dallas, Monroe, and Pulaski, reported unusually large outlay payments per capita. In the first-mentioned county extensive highway improvement was financed, and the remaining three counties reported large payments for the erection of courthouses.

CALIFORNIA.

The per capita expenses for general government varied from $2.03 in Alameda County, to $20.10 in Alpine County. Other counties showing high per capita cost of general government were Colusa, Del Norte, Glenn, Mono, and Trinity. In all of the counties named the population was less than 8,000.

Seventeen counties, or less than one-third of the total number, reported expenses for county libraries and only seven counties reported expenses for recreation. The latter consisted principally of payments for carnivals, county parks, and state and county fairs. Payments for exhibits at the Panama Pacific International Exposition have been included in the column headed "Miscellaneous and general."

Los Angeles County reported the largest amount for outlays. The construction of new school buildings and new highways accounts for the greater part of such expenditures. San Benito County showed the largest per capita payments for outlays, $27.44, nearly all of which was for highways.

COLORADO.

For nine counties no payments for protection to person and property are shown in the table. All counties of this state probably had expenses for jails, but such expenses were not separable from those for general government. It is probable that a part of the large amount shown as highway expenses for several of the counties were outlays, but on account of the incompleteness of the data an accurate segregation could not be made. Only one county, El Paso, reported payments for "Recreation," the amount shown in Table 6, $1,350, representing payments for band and carnival purposes. Yuma County reported no payments for public service enterprises, although the valuation of a cemetery appears in Table 11.

CONNECTICUT.

The large payment for outlays in New Haven County was for a new courthouse. The governmental cost payments of the counties of Connecticut are not comparable with those of other states, for the reason that in Connecticut the towns assume the expenses which in other states are generally borne by the counties.

DELAWARE.

No payments for schools are shown for the counties of this state, for the reason that the schools are independent of the county organization. The payments

for outlays reported by the three counties were, except for a small amount in Kent County, entirely for highway improvement.

FLORIDA.

Thirteen of the 48 counties of this state reported governmental cost payments of more than $10 per capita. St. Lucie County reported the highest per capita of such payments, $53.75, the greater portion of which was for outlays. Palm Beach County follows with a per capita of governmental cost payments of $42.03, with large outlay payments.

Very small payments for conservation of health and sanitation were reported by the counties of this state. The amounts carried in the column "Schools" represent the payments for all schools in the counties except those in incorporated cities. Palm Beach County reported the largest per capita of expenses for this department. The payments for expenses of public service enterprises reported by Putnam and St. Lucie Counties were for a toll bridge and a ferry, respectively.

GEORGIA.

Eight counties reported no payments for protection to person and property. The expenses for this purpose in these counties were probably included with those for general government.

Camden County is the only county in the state for which no expenses for highways are shown. Payments for this purpose were probably included with payments for other objects.

The amounts carried in the column "Schools" represent the counties' payments by reason of the schools within their boundaries. In many instances, the schools being under county control, the amounts here shown are the total expenditures for education in the counties. For those counties having independently organized school districts, no valuations of schools are given in Table 11, and any amounts shown for those counties as paid for schools represent only a portion of the costs of schools within the counties.

Butts and Green Counties reported comparatively large amounts for miscellaneous payments, the greater portion of which should undoubtedly have been distributed, but the records of the counties did not permit a segregation.

IDAHO.

Several counties show no expenses for conservation of health and sanitation. Those which do show this class of payments expended the greater part of it for quarantine purposes and for the suppression of contagious diseases.

The expenses for highways shown for some counties are high, and it is probable that the amounts shown as expenses in the column headed "Highways" include payments for outlays. In most counties all payments for expenses and outlays for highways are paid out of the road and bridge funds, and no segregation was possible.

The payments for schools represent the apportionment of the county levy for schools and the expenses of county high schools and the office of county school superintendent.

The amount shown for Oneida County in the column headed "Miscellaneous and general" represents the amount paid for county printing, which in the other counties of the state was distributed to the various accounts. The item included in this column for Twin Falls County represents the county's payments of judgments for damages.

ILLINOIS.

The principal items of expense in the column headed "Protection to person and property" were miscellaneous jail expenses and board of prisoners. The high per capita expenditure for Henderson County was due to the inclusion of county farm expenses with those of the jail.

Boone County alone reported no payments for conservation of health and sanitation.

Some counties reported large expenditures for highways, others reported small amounts or none at all. The expense of the general upkeep of the roads is met by township taxes for road and bridge purposes, and the only amount paid by the county is its proportionate share of these expenses. In those counties showing high per capita expenses for highways the amounts paid include the township as well as the county expenses for roads and bridges. In these counties the outlay expenditures are large for the same reasons.

In the column headed "Schools" are included county expenditures for salaries of county superintendent and deputy superintendent, records and office supplies, and expenses of teachers' institutes, farmers' institutes, and donations to county fairs and poultry associations. In some counties the salary of the county superintendent of schools was not reported separately, being included with the salaries of other county officials in the column headed "General government."

The items shown in the column headed "Recreation" represent expenditures for county centennials, celebrations, and carnivals.

INDIANA.

Jail expenses and salaries and expenses of county recorders' offices are the principal items making up the amounts shown in the column headed "Protection to person and property."

Twenty-seven counties reported no payments for conservation of health and sanitation. For these counties payments of this nature may be included in the items in the column headed "General government."

The line of demarcation between expenditures for upkeep and repairs and expenditures for outlays of highways is not very clearly drawn. Eight counties reported per capita payments for highway expenses in excess of $2, against an average of $0.84.

The amounts carried in the column "Schools" represent payments for the expenses of farmers' institutes and of the office of county school superintendent.

Franklin, Boone, and Dekalb Counties built new courthouses, and Tippecanoe and White Counties built new bridges during the year. These items account for the large per capita of payments for outlays shown for these five counties.

IOWA.

No payments for conservation and health were reported by any of the counties of this state.

The payments for education in this table represent only the counties' expenditures for farmers' institutes and salaries of county school superintendents.

The outlay payments of the counties of this state were unusually high per capita, the average being $2.43. For 19 of the counties the per capita outlays were in excess of $5, while for Pocahontas County $20.47 per capita was reported.

KANSAS.

Grant, Rawlins, and Wichita Counties did not report separately payments for protection to person and property, but probably included the payments for such purposes with those for general government.

Four counties, Cheyenne, Ford, Rawlins, and Reno, reported no payments for conservation of health and sanitation. If these counties spent money for those purposes, the payments were probably included with those for general government.

Eleven counties failed to report expenses for the maintenance of highways. Two of those counties, Ford and Hodgeman, reported large payments for outlays for highway construction and probably included maintenance payments with those for outlays.

Cheyenne, Grant, and Stanton Counties did not report separately payments for charities, hospitals, and corrections. Cheyenne County reported property valued at $1,200 used for such purposes and doubtless included the expense for maintenance with those for general government.

KENTUCKY.

Marion County alone reported no payments for protection to person and property. A jail valuation is shown in Table 11 for this county, and it is probable that payments of this class are included with those for general government.

Eight counties reported no payments for conservation of health and sanitation. Jefferson County reported a particularly large amount of payments for this purpose, the greater portion of which was expended for the suppression of tuberculosis.

Of the several departmental expenses in the counties of this state those for schools were by far the heaviest, for the reason that the schools in this state are a part of the county organization. Fayette was the only county reporting payments for libraries. This county made a donation to Lexington and Circuit libraries.

No payments for the expenses of the toll bridge of Fleming County were reported. It is probable that the receipts as shown in Table 4 were net, or that these expenses were not separable from those of general government.

The outlay payments of the counties of this state are uniformly small, the average per capita being $0.64.

LOUISIANA.

The small amount of payments reported by several of the parishes for protection to person and property was due in part to differences in classification and to the fact that the parish records in many instances did not permit the proper segregation.

The salaries and expenses of the president and members of the board of health and payments in connection with the suppression and control of contagious diseases are shown under the caption "Conservation of health and sanitation." On account of insufficient data furnished by several of the parishes, it was not possible to show separately the total payments for these purposes.

Of the six counties for which receipts from public service enterprises are shown in Table 4 only two reported payments for such enterprises. It is probable that for the other four the receipts shown were the net profits; otherwise, the payments are included with those for some other object.

MAINE.

None of the counties reported payments for conservation of health and sanitation.

Two counties, Androscoggin and Knox, reported no payments for highway expenses. Aroostook, Cumberland, Somerset, and York Counties reported payments for this purpose in excess of $7,000.

For Kennebec and Penobscot Counties valuations of their workhouses are shown in Table 11, but no payments for their maintenance are included in the column headed "Charities, hospitals, and corrections."

MARYLAND.

Washington County alone reported payments for a free library association and reading room. With this exception the county payments of this state are remarkably uniform.

No payments are shown for the wharves of Kent County, operated as a public service enterprise. These are doubtless included in some other item.

St. Marys County alone reported no payments for outlays. The payments of this county for the several objects of expenses were comparatively small.

MASSACHUSETTS.

The amounts carried in the column headed "Recreation" represent payments for the maintenance of park reservations and for the care of trees.

The payments tabulated as "Miscellaneous and general" are large. The greater portion of such payments represents the counties' apportionment of the dog fund.

MICHIGAN.

The segregation of highway outlays from highway expenses in the counties of this state was not complete, which accounts in part for the large amounts shown for some counties in the column "Highways."

The payments for schools were those for the expenses of the county school commissioners, superintendent of schools, teachers' institutes, agricultural instructors, etc. The financial affairs of the schools are administered by independent districts.

Wayne County alone reported expenses for library.

Two counties, Alger and Montcalm, reported recreation expenses such as those for music and public celebrations.

MINNESOTA.

The extremely high per capita for governmental cost payments shown for Cook County was caused principally by large outlay for a courthouse.

Kandiyohi County reported payments for expenses of a poor farm, which are included in the column headed "Charities, hospitals, and corrections," though no valuation for such an institution is shown in Table 11.

The four counties of Kittson, Marshall, Martin, and Pennington reported large outlays for drainage ditches, which accounts for the high per capita shown for governmental cost payments for those counties.

MISSISSIPPI.

The payments of eight counties for drainage expenses are shown in the column headed "Miscellaneous and general."

The governmental cost payments of Mississippi counties for the several objects were uniform, excepting those for interest and outlays. The outlay payments per capita for De Soto County were high because of extensive road improvement, being $10.39 against a general average of $1.61.

MISSOURI.

The large per capita payments for governmental costs shown for Bates, Cooper, Mercer, Monroe, and Pettis Counties are due to large outlay payments.

Franklin and Texas Counties reported payments for expenses of poor farms, though Table 11 shows no valuations of such property.

The amounts carried in the column headed "Schools" represent only the payments for expenses of county superintendents' offices and farmers' institutes.

A few of the counties reported large payments for miscellaneous purposes. Probably the greater part of the amounts shown in the column headed "Miscellaneous and general" should have been distributed to the various departments, but the data furnished were insufficient for a proper classification.

MONTANA.

The amounts carried in the column headed "Schools" represent payments for expenses of the office of county superintendent, of county fairs, and teachers' institutes, and the apportionment of county school revenue to the school districts. The valuations of Table 11 in the column "Schools" are those of county-owned high schools.

The public service enterprises for which payments are shown were ferries operated in Cascade and Sweet Grass Counties.

High per capita of outlay payments are shown for Granite, Lincoln, and Rosebud Counties, due to the construction of a courthouse in Granite County, to road improvement in Lincoln County, and to courthouse and highway construction in Rosebud County.

NEBRASKA.

Payments for protection to person and property were not reported by many of the counties and it is probable that payments for such purposes, where not reported separately, were included with those for general government.

The amounts included in the column headed "Schools" represent payments for the expenses of the office of county superintendent.

NEVADA.

The amounts included in the column headed "Schools" represent, almost entirely, the county apportionment to the school districts and the expenses of such high schools as are conducted by the counties.

NEW HAMPSHIRE.

Over one-half of the governmental cost payments in each of the counties was for charities, hospitals, and corrections. This class of expenses includes those of poor farms, care of paupers not on poor farms, care of dependent soldiers, support of children, etc.

No payments for schools are shown in this table for the reason that schools in this state are not under county control.

Cheshire County was the only county to report any considerable amount for outlays. All of the amount of outlay payments shown for this county was expended for the improvement and enlargement of the courthouse.

NEW JERSEY.

Ten of the 21 counties reported payments for the conservation of health and sanitation. Those reported by Essex and Hudson Counties were especially large because of the heavy expenses of the tuberculosis hospitals in these counties. Monmouth County reported heavy expenditures for hospitals; while the amount reported by Union County included expenses of the mosquito commission.

The amounts carried in the column headed "Schools" under the caption "Education" do not represent the payments for schools in the counties of this state, but only the expenses of the office of county school superintendent or examiner. The finances of the schools in this state are not under county control.

Essex and Hudson Counties reported large amounts expended for parks, which are here included in the column headed "Recreation." Part of these amounts should probably have been classified as outlays.

NEW MEXICO.

The governmental cost payments per capita for Chaves, Luna, Otero, and Sierra Counties are comparatively large. In the case of Chaves County, the per capita of outlays is high enough to influence the total per capita; in Luna County the per capita of all classes of payments are high, especially those for interest and expenses of general government and schools; in Otero County the per capita payments for expenses are high; and in Sierra County the payments for interest and expenses, especially those of general government and schools, are unusually large.

Payments for education are shown for all counties of this state, though no valuations of schools appear in Table 11. The amounts here included represent apportionments to district schools, salaries of county school superintendents, and expenses of county institutes.

NEW YORK.

The amounts included in the column headed "Schools" represent the payments of counties for such expenses as those of the office of county school superintendent and those for the training of deaf, mute, and blind children.

Chenango, Dutchess, and Erie Counties reported donations by the county to a library or library association.

Amounts are carried in the column headed "Recreation" for Erie and Schoharie Counties. In Erie County $2,000 was donated to the Hamburg Fair Association; and Schoharie County donated $50 to the Schoharie Historical Museum.

The per capita outlay payments shown for Franklin County are noticeably larger than those of any other county. Almost the entire amount of outlays reported by this county represents cost of highway improvement.

NORTH CAROLINA.

The reports secured from Clay, Currituck, Hyde, Macon, Person, and a few other counties were lacking in detailed information as to payments for certain objects and for this reason a complete segregation could not be made.

NORTH DAKOTA.

The column headed "Schools" includes amounts expended by the counties for the expenses of the office of county school superintendent and of institutes and the amounts apportioned by the counties to the school districts.

OHIO.

The data relating to payments for all counties in Ohio, except Cuyahoga and Hamilton, were obtained from public records at the state capitol in Columbus. The reports for Cuyahoga and Hamilton Counties were obtained from county records.

The amounts included in the column headed "Schools" represent expenses of county teachers' and farmers' institutes, teachers' examinations, etc.

Hamilton and Van Wert Counties reported expenditures for public libraries.

The payments for the expenses of the Hamilton County Memorial Hall are tabulated under the heading "Public service enterprises."

OKLAHOMA.

For those counties which did not report payments for protection to person and property, conservation of health and sanitation, or for highways, such payments as were made for those purposes were doubtless included with the amount shown under the caption "General government."

The amounts carried in the column headed "Schools" represent only the payments for expenses of the office of county superintendent and of county teachers' institutes, etc.

OREGON.

Twelve counties did not report separately payments for conservation of health and sanitation, but it is probable that payments for such purposes were included with those for general government.

The amounts included in the column headed "Schools" represent the apportionments of county revenues to the independent school districts, the payments for expenses of the county-owned high schools, county teachers' institutes, the office of county superintendent, and those of experimental stations.

The large outlay payments reported for Multnomah County were chiefly for a courthouse and for new roads.

PENNSYLVANIA.

The amounts tabulated in the column headed "Schools" are uniformly small, being only the payments for the expenses of county teachers' institutes

and examinations, for agricultural premiums at county exhibits, etc.

The amount shown as expenses of public service enterprises for Allegheny County was the expense of maintaining a soldiers' memorial hall. Toll bridges were operated by Luzerne County, but the cost of maintenance was not reported separately.

RHODE ISLAND.

No county payments are shown for the state, for the reason that the counties in Rhode Island have no independent treasury or revenues.

SOUTH CAROLINA.

Five counties reported no expense for protection to person and property, though each of them must have had some expense for the maintenance of a county jail. If there were such expenses they were included with those for other objects.

Only 11 of the 44 counties reported expenses for conservation of health and sanitation. It is probable that other counties had such expenses but reported them with expenses for other objects.

The amounts included in the column headed "Schools" are for the most part the apportionments to the independent school districts of the county 3-mill tax.

No payments for the expenses of public service enterprises are reported, because of insufficient data. The receipts from the dispensaries shown in Table 4 represent the net income from these enterprises.

The per capita payments for outlays shown for Dillon County are noticeably large, being $4.40 against an average of $0.28. This county expended considerable sums during the year for courthouse, jail, and highway construction.

SOUTH DAKOTA.

For a number of counties no payments for highway expenses are shown. Doubtless in these counties the necessary road repair was done by persons wishing to commute their poll tax and no record was kept of the amount of work done.

The payments for schools made by the counties were for the expenses of the office of county superintendent, school books and supplies, etc.

In the column headed "Miscellaneous and general" are included the expenses of drainage ditches.

The amounts tabulated in the column headed "Expenses of public service enterprises" represent payments for the purchase of seed and grain to be sold to farmers.

The highest per capita of outlay payments are shown for Clay and Walworth Counties. The greater portion of outlay payments reported by both counties was expended for courthouse construction.

TENNESSEE.

For Moore County no payments for protection to person and property were reported; and Lake County reported no payments for conservation of health and sanitation. The amounts expended by these counties for the objects named are doubtless included in other items.

High per capita payments for conservation of health and sanitation are shown for Dyer, Moore, and Polk Counties. In the case of Dyer County this is attributable to an epidemic of meningitis; and in the case of Polk County a large amount was expended for the suppression of smallpox.

For Hamilton, Madison, Polk, Roane, and Robertson Counties large outlays per capita were reported, the amounts being, respectively, $5.23, $3.16, $8.15, $3.10, and $6.72. For five counties, Decatur, Dickson, James, Perry, and Williamson, no outlays were reported.

TEXAS.

Those counties reporting no payments for protection to person and property probably included such payments with those for general government.

The amounts included in the column headed "Schools" represent the payments for agricultural demonstrations and for incidental expenses of county school trustees. The financial affairs of the schools of this state are independently managed.

A high per capita of outlay payments is shown for Armstrong, Jackson, Liberty, and Pecos Counties. The amounts of outlay payments reported by Jackson and Liberty Counties were chiefly for highway constructions; those for Armstrong and Pecos represented cost of courthouse and jail construction.

UTAH.

Included in the column headed "Schools" are the apportionments to the independent school districts and payments for the expenses of county high schools and the office of county superintendent, etc.

The amounts shown for expenses of public service enterprises represent the cost of operating a ferry in Grand County and a water-supply system in Salt Lake County.

VERMONT.

A small part of the expenses for protection to person and property was paid by the counties, the greater part by the state. Five counties did not report any payments for such purposes, but it is probable that in some instances such payments were included with other items shown in the column headed "General government."

VIRGINIA.

Several of the counties in the state did not report separately payments for protection to person and

property, or for conservation of health and sanitation. It is probable that payments for such purposes were included with expenses for general government.

The payments by the counties of Virginia for school purposes were small, as the schools were administered by independent school districts.

The large amount shown for Russell County in the column headed "Miscellaneous and general" represents payments of judgments.

WASHINGTON.

The highest per capita payments for governmental costs are shown for Franklin and Mason Counties. These counties also have the highest per capita payments for outlays.

The amounts carried in the column headed "Schools" represent the apportionment of county revenue to independent school districts and expenses such as those for the office of county school superintendent, county teachers' institutes, etc.

The payments for recreation reported by King County were for parks.

The expenses of public service enterprises shown for King County were operating expenses of ferry and wharf properties.

The large expenditures for outlays reported for King County were chiefly for the improvement of waterways.

WEST VIRGINIA.

For certain counties, notably Logan County, the per capita expenses for general government are unusually large, due to the fact that the reports received did not properly distribute expenses to the different functions of government.

The item, $1,000, shown for Ohio County in the column headed "Recreation" represents the amount appropriated by the county to aid in a centennial celebration.

WISCONSIN.

Calumet County did not report separately payments for protection to person and property. Expenses for such purposes were probably included with those for general government.

Two counties, Fond du Lac and Waukesha, did not report separately expenses for conservation of health and sanitation but probably included payments for these purposes with those for general government.

The payments for schools shown for the counties of the state are chiefly those for the expenses of the office of county superintendent and of county agricultural and training schools.

The payments for libraries reported for Langlade County were contributions to a town library; those for other counties were for county traveling libraries.

The items shown in the column headed "Recreation" represent memorial day expenses and expenses for county parks.

Florence County reported per capita outlay payments of $11.44 against the state average of $1.10. The outlay payments of this county were mostly for highway improvement.

WYOMING.

The payments for schools in the counties of this state were those for expenses of the office of county school superintendent and of institute instruction, appropriations for county fairs, and apportionment of county revenue to district schools.

Eleven of the 13 counties of the state reported payments for the expenses of county public libraries.

Park County reported a high per capita of outlay payments. The outlays of this county were for the construction of a courthouse and jail and for improvement of highways.

TABLE 7.

Per cent distribution, by principal classes, of revenue receipts and governmental cost payments of counties.—Table 7 presents, by states, the per cent which the receipts from each class of county revenues constitute of such total revenue, the per cent which the payments for each of the principal classes of county governmental costs constitute of the total of such payments, and the per cent relation of the total revenue receipts to the several classes of governmental cost payments. The percentages for revenue receipts have been computed upon the basis of the receipts shown in Table 3, and those for governmental cost payments have been computed upon the basis of the payments shown in Table 5. Certain inaccuracies pointed out in the text relating to Tables 4 and 6 necessarily affect the data presented in Tables 3, 5, and 7. It is believed, however, that the proportions of the different classes of revenues and expenditures are not seriously affected thereby.

Per cent distribution of revenue receipts.—Table 7 shows that property taxes, including both general property taxes and special property taxes, comprised more than three-fourths, or 76.4 per cent, of the revenues of the counties of the United States. Of the geographic divisions, the Pacific division derived the largest proportion, 84.3 per cent, of county revenues from property taxes; while of the individual states, West Virginia counties received the largest proportion, 93 per cent, of their revenues from this source.

Earnings of general departments and receipts from miscellaneous sources ranked second in relative importance, comprising 7.7 per cent of the total revenue receipts of counties. The counties of the East North Central division derived 14 per cent of their revenues from this source, which is the largest proportion shown for the geographic divisions; while the counties of Connecticut exceeded those of other states in the proportion of receipts derived from revenues of this class, which amounted to 26.6 per cent of their total revenue receipts.

Subventions and grants from other civil divisions, principally for school and road purposes, constituted 6.5 per cent of the total receipts of all counties. The proportions of their receipts for the several states differ widely because of the varying degrees in which these functions of government are administered by the counties. Donations and gifts constituted only a very small part of the amounts on which these percentages are based.

Per cent relation of revenue receipts to governmental cost payments.—Of the total revenue receipts of the counties of the United States, 79.8 per cent was required for meeting expenses and interest, leaving 20.2 per cent available for outlays, reduction of indebtedness, purchase of investments, or increase of cash in the treasury. The largest percentage of revenues available for purposes other than expenses were reported by the counties of Iowa, the expenses of which amounted to only 64.7 per cent of their total revenues, leaving 35.3 per cent available for other purposes. Minnesota and Wisconsin follow closely with 65.4 per cent and 66 per cent, respectively, for expenses and 34.6 and 34 per cent for other purposes. The expenses of the counties of Idaho, on the other hand, exceeded the total revenue receipts by 6.7 per cent, showing that the governmental costs of these counties, which were properly chargeable to the year, consumed all the revenues of the year and besides this either required an increase in indebtedness or resulted in lessening the assets in the form of investments or cash.

Per cent distribution of governmental cost payments.—Of the total payments for governmental costs, 72.1 per cent was used for expenses, 4.5 per cent for interest, and 23.3 per cent for outlays. Nearly all of the payments for expenses were for the support of the general departments of the county governments, a very small part being for the administrative and operating costs of public service enterprises. The largest proportion, 92.3 per cent, of total payments devoted to expenses of general departments was for the counties of New Hampshire; while the smallest, 53.8 per cent, was for the counties of Minnesota. Interest payments of counties ranged from 11.4 per cent of the total payments of New Jersey counties to 0.5 per cent of all payments of Vermont counties. The largest proportion, 45.2 per cent, expended for outlays was reported for the counties of Vermont, while the counties of Maine expended for outlays only 2 per cent of their total payments.

In Rhode Island the counties are merely judicial districts and have no financial transactions. The District of Columbia, being coterminous with the city of Washington, is treated as a city, and its financial transactions will be found in Part VIII of this report.

Tables 8 and 9.

Nonrevenue receipts and nongovernmental cost payments of counties.—Tables 8 and 9 present, by states and by counties, the nonrevenue receipts and nongovernmental cost payments of counties, each being classified under five different headings.

Receipts and payments in trust and agency transactions constitute the greater part of the total amounts appearing on this table; the receipts of this kind amounting to $425,331,927, or 80.9 per cent of the total receipts, and the payments on these accounts amounting to $422,226,435, or 84.9 per cent of the total payments. Next in order of importance are the receipts and payments on account of indebtedness incurred and redeemed; the receipts from debt obligations issued amounting to $86,051,348, or 16.4 per cent of the total receipts, and the payments for redemption of debt amounting to $58,965,207, or 11.8 per cent of the total payments shown on the table.

The amounts received from sales and paid for the purchase of investments and supplies show that during the year 1913 the counties of the United States increased their assets in the form of investments and supplies to the amount of $1,723,447. Counterbalancing receipts and payments were reported to the amount of $3,136,937. General transfer receipts, comprising transfers between departments independently administered, amounted to $7,721,830, while transfer payments amounted to $7,788,023, the difference being due to difference in fiscal years of counties and some of their departments.

Tables 10 and 11.

Value at close of year of properties and assets of funds.—In Tables 10 and 11 the values of properties belonging to the counties are presented under six different headings, while the last column shows the assets of their investment and public trust funds.

Certain evidences of incompleteness in the reports received, as well as additional data, are presented in the paragraphs which follow:

ARKANSAS.

No valuations are carried in the column headed "Schools and libraries," for the reason that the schools in Arkansas are independent of the counties.

No valuation is shown for Garland County in the column headed "Charities, hospitals, and corrections," although payments for the expenses of a poor farm are given on Table 6.

CONNECTICUT.

Windham County had no courthouse. The item of $2,675 represents the value of office furniture and a law library.

It is probable that a part of the valuations shown in the column headed "Jails" should be included with the items shown in the column headed "Charities, hospitals, and corrections," but the reports returned did not provide data for an accurate classification.

DELAWARE.

New Castle County had a workhouse the valuation of which is included under the heading "Charities, hospitals, and corrections." The county used a part of this building for the county jail, and for this reason no separate valuation appears under the heading "Jails."

GEORGIA.

Four counties in the state did not report separately the value of jails, but probably included their value with that of courthouses.

IOWA.

No valuations for schools are shown, although payments for schools appear in Table 6. The schools of Iowa are owned by independent districts and the payments of Table 6 represent in no way the total expenditures for schools in the counties.

MICHIGAN.

No amount is shown for Manistee County in the column headed "Jails." The valuation of courthouse reported by this county may have included that of jails.

Newaygo County owned no jail or courthouse.

MINNESOTA.

A number of the counties did not report separately the value of jails. In the case of several counties the reports stated that the value of the jails was included with that of the courthouse and it is probable that such was the case in the remaining counties.

MISSOURI.

Sixteen counties did not report separately the value of jails. The majority of these reports stated that the value of the jail was included with the value of the courthouse and it is probable that such was the case in all counties not reporting separate valuations.

MONTANA.

Eleven counties reported the value of school properties. In each instance the valuation shown is that of the county-owned high school.

NEVADA.

The valuations given in the column headed "Schools" are those of county-owned high schools.

NEW JERSEY.

No valuation is shown in the column headed "Jails" for Mercer County, for the reason that this county was using the basement of the courthouse for this purpose until the new jail could be completed.

The valuation of schools are not given, since the schools in New Jersey are township and not county property.

The values of parks were included in the large amounts appearing in the column headed "All other" for Essex and Hudson Counties, and were $6,157,647 and $2,972,346, respectively.

OHIO.

Two counties, Hamilton and Van Wert, reported payments for the maintenance of public libraries but failed to return the valuation of such properties.

OKLAHOMA.

Several counties in Oklahoma did not report the value of courthouses or jails, but as many of the counties were recently organized, such properties had not been acquired, and rented quarters were occupied.

PENNSYLVANIA.

The amount shown in the column headed "Public service enterprises" represents the value of a soldiers' memorial hall in Allegheny County and of toll bridges in Luzerne County.

SOUTH CAROLINA.

No valuations appear in the column headed "Public service enterprises," for the reason that the public service enterprises from which the counties of this state derive revenue are the property of the state.

SOUTH DAKOTA.

Due to the nature of the public service enterprises conducted by the counties for which receipts and payments are shown in Tables 4 and 6, no valuations of such enterprises are given in this table.

TEXAS.

The valuation for courthouse property was not reported for several counties. Loving and Willacy Counties were newly organized and had no courthouses. The amount shown for Parmer County represents the value of a courthouse site.

The following counties reported that they owned no jail property: Andrews, Concho, Gaines, Parmer, Terry, Upton, and Yoakum. In the case of the other counties for which no valuations appear in the column headed "Jails," the valuations of courthouses probably include those of jails.

VIRGINIA.

The valuations shown for public service enterprises represent the value of wharves owned by the counties of Elizabeth City and Gloucester.

The large item shown for Norfolk County as assets of investment and public trust funds was the reported valuation of ferry property owned jointly by the city of Portsmouth and Norfolk County.

WASHINGTON.

Only two counties reported the value of jail properties separately. Twenty-six of the counties stated that the value of jail was included with that of courthouse and it is probable such was the case in the remaining counties.

The amount shown for public service enterprises for King County represents the value of ferry and wharf properties.

WEST VIRGINIA.

No valuation of the county jail was returned for Barbour, Monongalia, Pocahontas, Roane, and Taylor Counties. It is probable that for these counties the valuations of courthouses include those of jails.

WISCONSIN.

The valuations shown in the column headed "Schools and libraries" were for agriculture and training schools.

WYOMING.

The valuations shown in the column for schools and libraries represent the value of libraries only, as the schools are administered by independent school districts.

GENERAL TABLES

TABLE 1.—SUMMARY OF RECEIPTS, PAYMENTS, AND CASH BALANCES OF COUNTIES, BY GEOGRAPHIC DIVISIONS AND STATES: 1913.

[For a text discussion of this table, see page 58.]

GEOGRAPHIC DIVISION AND STATE.	Cash balances at beginning of year.	RECEIPTS.			Aggregate of receipts and cash balances at beginning of year.[1]	PAYMENTS.			Cash balances at close of year.
		Total.	Revenue. (Table 3)	Nonrevenue. (Table 8)		Total.	Governmental cost. (Table 5)	Nongovernmental cost. (Table 8)	
Total	$171,950,795	$895,668,452	$370,043,046	$525,625,406	$1,067,619,247	$882,405,173	$385,181,760	$497,223,413	$185,214,074
NEW ENGLAND	1,135,517	8,607,353	5,775,315	2,832,038	9,742,870	8,572,965	5,803,483	2,769,482	1,169,905
